Hiragino Kaku Gothic Std W8 31

Hiragino Kaku Gothic Std W8.otf 0 14) we have again identified three groups of candidates (Figure \[fig:mips\]) which are all relatively well-matched with our model, and which we here term the first three tiers of candidates. ![Magnitude versus the predicted Y band absolute magnitude for white dwarf candidates from the MPFC15 White Dwarf Catalog with no reliable constraint on parallax (but observed to be within $2\farcs4$ of a star to form a close pair). []{data-label="fig:mips"}](f8_color.pdf){width="50.00000%"} Conclusion ========== We have presented the first up-to-date (April 2018) white dwarf catalog from the MPC. We also presented the first model of the absolute magnitudes of white dwarfs as a function of temperature, and explain why the model is so close to the empirical Johnson-Kron-Cousins system. Our model allows us to calculate the distance that each white dwarf will have based on its absolute I magnitude, and we put it online at [We have also explained how to use this model to quickly and easily identify the right WDs for spectroscopy at high proper motion.
