Users can also upload their own cover art to be used as retrievals sources. Retriever can work with files in any audio format and supports wildcards. Retriever searches covers from a number of sources like TuneWiki, MusicBrainz and Skiesoft - 3D, an awesome sky at your desktop Skiesoft - 3D - an awesome sky at your desktop Creating personalized virtual sky is now a breeze with Skiesoft - 3D. You can choose from a large number of predefined sky areas. Each area includes information about the sky objects. You can adjust any of the objects to the location of your choice, which can be an arbitrary point in the sky. You can also adjust its brightness, color and overall appearance. If you want to build your sky from scratch, the powerful tools will help you to create one by one. There is a large list of objects that you can choose from, including stars, sun, moons, planets, meteor showers and many more. Skiesoft - 3D also allows you to import some well-known images. For example, the list includes red planet (Mars), auroras, a meteor shower, meteors, comet and many other celestial objects. Importing a sky from an image is very easy. You can also import a "sky" from any drawing application (Inkscape, Photoshop, Photoshop Express, CorelDraw, etc.), and Skiesoft - 3D will read them as well. Skiesoft - 3D also allows you to combine the imported "sky" with any other sky area. You can also export "skies" to a number of popular image formats (JPG, PNG, BMP, GIF, WMF, ICO, EPS, etc.). Skiesoft - 3D Key Features: * Navigate and adjust the sky objects. * Add stars and asteroids into your sky using the built-in Star Editor. * Import skies from Photoshop, CorelDraw, Illustrator, Inkscape, MSPaint, Paint.NET and others. * Adjust color, brightness, opacity and other properties. * View the sky objects or their own appearance. * Build the sky from scratch or combine it with any other sky 70238732e0 [printer samsung ml 2165 reset v05](#).
