
KeyMacro Outlook Addin is a reliable tool, that can record activities from a specified time interval. It allows you to record your activities directly from the calendar, so you can easily see when you work. Moreover, it can automatically transfer the recordings to other Excel files, based on your specified time intervals. Real-time time management KeyMacro Outlook Addin is compatible with Outlook 2007 and later. The tool records all of your activities from the day you specified. Moreover, the records can be retrieved and saved. The log can be exported to one of the supported formats: PDF, HTML, MHT, RTF, XLS, CSV, Text, image or XPS. Moreover, in case you wish to send a particular file to a specified recipient, you may easily create a stamp that can block other users from copying the content. Calendar, time intervals and user permissions KeyMacro Outlook Addin allows you to record the time you spend working every day, in a log of events, based on your specified time intervals. The log can be saved in Excel files. The log can be shown in different calendar views, such as WorkWeek, WorkDay or WorkDayMon-Fri. Furthermore, the tool can set a user's permissions, so your employer or clients can view the log only when you are logged into the email client. KeyMacro Outlook Addin works on both personal and work machines. Moreover, the log can be exported to the supported formats: PDF, HTML, MHT, RTF, XLS, CSV, Text, image or XPS. Moreover, in case you wish to send a particular file to a specified recipient, you may easily create a stamp that can block other users from copying the content. Productivity time tracker for Outlook

KEYMACRO is a keyboard macro/recording software that lets you create custom keystrokes, or macros, which you can re-record later, in order to perform specific actions. The program supports a wide range of functions, such as copy, open, paste, save, new, help, undo, skip, options, filter, replace, web, and more, which are activated by pressing the designated key combination. A set of predefined macros can be accessed directly by pressing the Record Macro button. A simple user interface and a large amount of supported functions The application is presented in a straightforward way, with a single window, which includes a list of supported actions, a list of macros and a message box that can display custom messages when recording a macro. Using the mouse, you can select a macro to record. After doing so, you need to assign a shortcut to the macro by pressing the Record Macro button. KeyMACRO comes with a large number of predefined actions, which you can access by pressing one of the numbered buttons on the screen, and you can create your own macros by dragging and dropping the action you want to assign, on the main window. This application can be used to edit Windows Registry, as you can select the right path by using the Recurse check box, which is useful to get rid of any potential error. As it provides a comprehensive set of functions, you can use this program to perform various actions, including web browsing, image viewing, file editing, backup, and more. It is the perfect software to automate repetitive tasks and save time, as it is very easy to use, especially for the beginners. KEYMACRO is a simple tool that makes it possible to create custom keystrokes, or macros, which you can re-record later, in order to perform specific actions. It has a simple user interface, with a list of supported functions and a message box that can display custom messages when recording a macro. Fast and efficient document conversion software. Converting your files is one of the most important activities of any project you work on. The efficiency of document conversions is imperative, not only from a time perspective, but also when it comes to document reliability and accuracy. Fast and efficient document conversion software.
