What's New In?

Alo is a latest and unique software for scanning your photos with much less time and much less effort than a traditional photo scanner. Thanks to our new advanced software, you'll be able to scan 35 images per minutes on 2 Megapixel Canon digital cameras and a equivalent on any resolution video camera without any post processing. Welcome to the world of photo scanning, where magic and technology

meet and work together: you give the world, your photos and we take them! Alo is fully automatic, so you don't have to worry about a single detail. Alo will automatically match colors, darken contrast, sharpen edges and fix lighting and shadows. It will even restore over 250 different details, from color cast and contrast to details. All you have to do is select the preset of your choice, adjust it to your liking and "scan". If you want the best results, you will be able to fine-tune some parameters, such as: video camera resolution, white balance or contrast. We are pleased to introduce all new features of AloPhotoScan software:

- Universal Algorithm to scan photos from all video cameras, including the most recent Canon EOS 7000D
- Use of the best quality ratio to fit to the intended use of your photos, such as: slideshow, printing, or digital picture frame.
- A lot of different presets for applying fixes and effects to your photos.
- A variety of special effects and image modifications for your pictures
- Thumbnail and image size presets for your files
- A lot of cool filters that you will be able to apply to your images to lighten, sharpen or color correct
- Save to file right after scanning
- Preview photos from the folder, and their thumbnails

Flash Photo Strips is a tool for manipulating flash photos in a photo editing program. The photos are imported through Magic Lantern; this tool provides a very high quality and excellent color accuracy for the photos and keeps the metadata intact. Photos can be split or merged, tinted and recolored, or imported to Color-Lovers. Maska Tame is a photo editing program (can be used online, too) that includes many tools like Burn, Invert, Resize, Flip, Sharpen, Crop, Exposure and Contrast, Shadows and Highlights, Vignette, Tint, Hue/Saturation and more. Also has a simple but useful 'Panorama' tool.
