Monark v1.3.0.3 HYBRID WiN MacOSX R2R Monark v1.3.0.3 HYBRID WiN MacOSX R2R native instruments monark v1.3.0.3 hybrid macosx r2r. Team R2R 07 November 2019 14 MB. iZotope Ozone Advanced 9.0.2 [MacOS] native instruments monark v1.3.0.3 hybrid macosx r2r. Team R2R 07 November 2019 14 MB. CREDITS Monark was developed by Team R2R, a small group of passionate people in Sweden with the support of an award-winning, Swedish creative agency.

The award-winning creative agency was awarded with the Gold Award for their work on the "For Love" campaign for NOKIA in 2014, being the first-ever Swedish agency to win a Gold Award at the Cannes Lions. In addition to their brilliant work on NOKIA and the Monark project, the Team R2R members have previously been awarded for their work at The Swedish Creativity Awards, One Show, Sweden's Best & Brightest, Forte\* and The Future is Bright. About the concept The team at Team R2R was tasked with creating something the studio has never worked on before, as the team was allowed to use their creativity to come up with something new. After countless brainstorming sessions, many prototypes, and a lot of experimenting with different sounds and voices, they finally settled on their solution, which is the original Monark sound. Supporting the project Monark was developed for the web, but could not stand on its own. This is why we invested all

---

our efforts into creating an application that would capture the pure and organic sound of the Monark synth, and deliver that to all our web-audio fans. A lot of research, prototypes, iterations, and collaboration, later on we ended up with Monark on iOS, where it has been a big success. Now we are extending the application to Android. Giving a tribute to the past Monark is not just an application – it's a tribute to all the amazing and memorable sounds and voices in the history of analog synthesizers. We captured the pure sound of the Monark synth, and we hope you'll enjoy it. Monark Synth Sound
