A version of AutoCAD was developed with VBA, the Visual Basic for Applications, which was discontinued in AutoCAD 2013. Acronyms Acronyms used in the company and the software are as follows: Clients Collected in the following table: History AutoCAD was initially created by William H. Gates III, the brother of Bill Gates, and Donald DeLine of Coktel Vision. AutoCAD (then known as CADDraft) was originally based on the Coktel system. Originally the first version was developed in Coktel Vision for the Coktel Vision 100 personal computer. The version was called CADDraft, even though Coktel Vision is not a CAD software company. The Coktel Vision 100 was a modification of the Xerox Alto, a computer with three disk drives. The disks were used for the X window system, a UNIX System V program to display documents on a text-based terminal, and some data applications like mail, telephone, and scheduling. In the fall of 1981, Bill Gates formed Micro-soft to develop software on DOS. He went to

Don DeLine to look for a CAD software for DOS. They agreed CADDraft would be used. Since 1981, there have been changes to the operating system of Windows from the original Windows 1.0 to the current Windows 10. 1990s to 2000s In August 1994, Bill Gates returned to his brother's company, Micro-soft. They decided to re-use their old files and write new programs from scratch. William H. Gates III left Coktel Vision in March 1994. Donald DeLine continued to work for Coktel Vision. A company was founded, known as Micrografx. The new company's name was Autodesk, a new acronym for the names of the three founders: Autodesk Inc., Autodesk Design Inc., and Autodesk Technology Corp. Autodesk had five developers and a product manager. Autodesk focused on 2D CAD, and introduced 3D CAD in 1996. Autodesk paid developers and artists who worked for Coktel Vision to continue working for Autodesk. They changed the software so that it a1d647c40b
