Cadalyst.Q: Converting a Java Json String to a JSONObject I'm

converting a List to a Json String

using: public static String

```
convertToJson(Object obj){
```

```
JSONObject json = null; try { json
```

```
= new
```

```
JSONObject(GSON.toJson(obj));
```

```
} catch (JSONException e) {
```

`e.printStackTrace(); } return
json.toString(); }` And I'm
receiving the `String` back from a
server, is there a way to convert
that `String` back into an
`JSONObject`? Currently I'm
converting it back to a `JSONArray`
using: `public static JSONArray
convertFromJson(String input){
JSONArray ja = null; try { ja =
new JSONArray(input);`
