Cloud Sticky Notes Product Key Full For Windows

A simple, easy to use, fully featured macros recorder. KEYMACRO is a utility that allows you to record macros or sequences of keystrokes and easily play them back with just a few clicks. KEYMACRO is designed for desktop users, and it is available for Windows XP, Vista, and Windows 7, Mac OS X and Linux. CREATE Macros KEYMACRO allows you to create and save macros, or create new sequences of keys. This is possible via a simple, intuitive interface that is used for recording and editing actions. You can define a keystroke or a sequence of keystrokes and define which of your Windows or Mac OS X hot keys should trigger them, and how long should they take. STORE Macros Once you've created your macros, you can either save them as a single file or save them in a new or existing folder as a collection of other macros. In addition to that, you can use the keystroke creator to customize how your macros trigger. You can even use the shortcut creation tool to create new shortcuts with specific actions for multiple macros. REPLAY Macros When you have recorded macros, you can replay them via the keystrokes editor. The editor lets you select a hot key, specify a string that should be displayed while the macro runs, and set different effects. After you have specified all of this, you can replay the action or sequence of actions you have recorded in your macros. CAPTURE Macros When you are on a site that uses Macromedia Flash or the Java Applet to display video, games, online forms or the like, you can capture the screen using KEYMACRO's capture tool. This feature is especially useful if you are testing websites or online games and want to record the actions of users. You can customize the capture process, and you can set the zoom level, the contrast, and the window size, all of which can help you in the editing process. KEYMACRO Features: *Create, save, store, and replay macros and sequences of keystrokes. *Capture screen and videos using the built-in capture tool. *Record macros and sequences of keystrokes and edit them later on. *Keyboard shortcuts for system-wide actions. *Edit shortcuts via shortcut creator tool. *Customize your keyboard shortcuts using the profile editor. *Open source and FREE. They can be stored offline as well as uploaded to the cloud via an account. Store sticky notes offline or in the cloud The installation procedure is a speedy task that shouldn't give you any trouble. The only notable aspect is that Java must be installed in order for the app to work. You can get started by creating an account with an email address and password for uploading sticky notes to the cloud, or skip this step if you want to keep the files stored offline. Create, manage and customize sticky notes By default, the sticky notes have a yellow background, thus resembling physical sticky notes. However, you can change this color into something else, which particularly comes in handy if you want to add numerous sticky notes to the desktop and easily tell them apart by color. It's possible to write titles, resize the notes to any dimensions, adjust their transparency color, clone notes, integrate them into the systray for quick access, hide one or more notes at a time with one click, set reminders with a specific date and time, delete any note, as well as synchronize all notes to the cloud with one click. Configure general program settings The software utility also gives you the possibility to change the default font style and size. You can disable confirmation dialogs for deleting notes and exiting the program, hide
