mobile devices. How to Use AutoCAD If you have just started using AutoCAD, you may be uncertain where to begin. The software has a main menu bar with several features, including a Draw tool and a selection tool. To create a new drawing, select the Make Drawing option in the menu bar, then click on the New button. You can then draw a rectangle or other shape and then select Properties and click on the Polyline button to create an outline of your shape. If you want to draw a circle, select the Draw option in

the menu bar, click on the Circle button, and then click and drag to create a circle. To place an object such as a wall, select the Select option from the menu bar and choose the object. Then click on the Move Tool button, click on the location where you want to place the object, and click on the object. If you want to move objects relative to each other, select a command from the Draw option in the menu bar. Click on the Change Location button, click on the other object, and then click on the Select button. You can

---

connect objects together. For instance, to connect two objects, select the first object, click on the Connect button, then select the second object and click on the Connect button. You can also create a line and curve by selecting and dragging along the drawing screen. Workflow The Workflow feature helps you easily build 2D and 3D drawings. You can create a new drawing or open an existing one. You can then select the items you want in your drawing, and then you can drag them to where you want them in the
