

World War Two and the topic that draws them together is the understanding of radiation and/or radioactive contamination. Topics covered include electromagnetic induction, voltage and magnetic fields, gamma and beta radiation and its measurement, radioactive substances, radiation science, the shape and color of materials, nuclear power, nuclear weapons and the subject is thoroughly illustrated with numerous working models. People can complain that a book is missing. I can not check the book to see if it really exists or not. In fact, the book is still in the archives to be checked by other researchers. I do not plan to purchase the book. How do I know if a book exists or not? There are two ways. The book is probably existing. Unfortunately, though I can not check, I can find out it from the book history records. The book history records are located in the Bureau of Patent, Trademark and Copyright.
