Even those who do not play the game are familiar with the term – the “Xavier Apple” is a puzzle game, in which you try to find a chain of logic that leads from its start to a target end. You may have heard of the “Busy Beaver”, or the “Nim” games – but the “Xavier Apple” is different: the puzzle you have to solve is more complex, and more demanding. The “Xavier Apple” may remind you of the classic game “Crosswords”. This video will demonstrate the fundamental principles of the game, and provide a short history. In more detail: The “Xavier Apple” has been around for a long time – from its birth, the game has been used to train people in the field of logic, and to test the capabilities of computers in the field of artificial intelligence. Over the years the game has evolved and grown in complexity. The rules that define the problem have been refined, as have the mechanics to solve the game – in recent years the “X 77a5ca646e
