KEYMACRO is a simple keyboard macro recorder, which can create a personal command database, by making use of the QuickKeys feature of Microsoft Windows. The application can record the keyboard input of any keyboard, when you use the keyboard shortcuts. It does not require any registration, license or registration. KEYMACRO is available in the following languages: English, Dutch, Spanish, Portuguese, Italian, Hungarian, Serbian and Russian. Keyboard recorder and editor Keyboard recording features are included within the application. You may select the desired shortcut, which you would like to use in your personal database. You may use the mouse to activate the desired shortcut, which is then recorded. You may start recording a new keyboard macro, from scratch or import the keyboard recordings you have already created. Keyboard recording options are readily available and allow you to select the length of the recorded input, the location of the current cursor, the buffer time and the key repeat interval. You may also activate the keyboard recording features in full screen mode. A tooltip in the application's title bar displays the current recording, buffer time and cursor position. You may save the keyboard shortcuts, under a convenient menu item, using the settings window. You may use the keyboard recorder to modify the existing keyboard shortcuts. The input is displayed in real-time and you may edit it or even replace it with a new text. You may also activate and deactivate the keyboard shortcuts. KEYMACRO supports the following languages: English, Dutch, Spanish, Portuguese, Italian, Hungarian, Serbian and Russian. Keyboard recorder and editor features The program is available in the following languages: English, Dutch, Spanish, Portuguese, Italian, Hungarian, Serbian and Russian. KEYMACRO allows you to view the currently registered keyboard shortcuts, edit the text in real-time, replace the existing text, deactivate the currently selected keyboard shortcuts, restart the program and exit. The recording feature is available only in the following modes: full screen, window and the keyboard is being used. KEYMACRO supports the following keyboard types: Microsoft Windows, Microsoft Virtual, USB, PS/2, Serial and Apple Mac. The program is available as a standalone version and as a portable executable. USB version KEYMACRO Portable is available as a portable executable, which does not require installation. The portable executable stores the entire folder structure and does not rely on external programs. The portable executable is a simple Microsoft Windows executable, which runs on all modern Microsoft 1d6a3396d6
