It was brought to my attention recently that "bzd status" is currently not working on my systems. I don't have it installed and I am also missing the manpage. How to get it back? A: For the local filesystem, it's part of bzd-2.5.1, available at For the bazaar branch, it's in a bzd-2.5.1-branch and a bzd-2.5.1-pack-dev directory. It has docs in bzd-2.5.1/doc/en/index.html and bzd-2.5.1/doc/dev/index.html, and can be installed in the standard location for documentation (eg. /usr/share/doc/bzd) A: If you installed Bazaar through the package manager, you can use "apt-get search bzd". On Fedora it would be: \$ sudo apt-get search bzd A: As it turns out the man page has been rolled into bzd-doc, a1d647c40b
