Report #: A346-B Arrowhead
Manuals & Support The
following is just my opinion, and
does not reflect any opinion or
attitude on the part of the
developer. This is an almost
complete compoent, without any
preset work or core form inside
the application. So, it takes a bit

more time to load than applications based on code bundled in the application's executable. But this happens only one-time, when the application starts. The design is elegant, and not too easy to use. So, a user has to learn about the menu and submenu structure to be able to use the application. The tools work very well, also they work absolutely, but they are not designed to be flexible for different configurations. The

static text are hard to read and to access in realtime. So, a user may chose not to use the static text. In case of dynamic text, it is possible to go on. The ability to create dynamic text and have the ability to change the text from the graphical window. The ability to write a third language (Internal/External) in order to be able to create a version of the application for different target devices. Report #: A346-B

The application provides you with a simple tool to help find out if the service is working correctly. PingLookUp features include: - *Record New Trace Routes* - *Record Trace Routes to External Services* - *Record New Hosts* - *Record Hosts for External Services* - *Record External Services* - *Automatically Check External Services* - *Searching for IP

Addresses of External Services*
- *Finding Out External Services
from Their IP Addresses* -
*Find IP Addresses of Services
in the TraceRoute* - *Finding
Out Services and Their
Associated IP Addresses* -
Lets You Clear Your Traces -
*Need to Perform a Trace for
Any Data Source?* - *Fast
Searching in Ping, Trace and
New Hosts* - *Filling in Trace
Routes by Copying Linked
Networks* - *Playback of Trace

Routes* - *Copy Trace Routes*
- *Find Trace Routes by Linked
Networks* - *Find Trace Routes
by Network Names* - *Find
Trace Routes by IP Address* -
*Find Trace Routes by IP
Address in a Cloud* - *Reverse
Lookup* - *Rewrite Trace
Routes* - *Copy External
Service Data as Trace Routes* -
Host Name Lookup - *Obtain
IP Addresses* - *Obtain Host
Names* - *Obtain Services* -
Obtain an IP Address -

***Obtain a Service* - *Obtain Networks* - *Obtain Net Links* - *Obtain Subnets* - *Obtain IP Addresses and DNS Names* - *Obtain Subnets and IP Addresses* - *Obtain IP Addresses of a Subnet* - *Obtain DNS Names of a Subnet* - *Obtain Subnets from Subnet in a Cloud* - *Obtain Subnet as a Trace Route* - *Obtain Subnet as a New Host* - *Obtain Network Links as Trace Routes* - *Obtain Network**

Links as New Hosts* - *Obtain
IP Addresses of Trace Routes* -
*Obtain IP Addresses of New
Hosts* - *Save Trace Routes* -
Clean Up Trace Routes

What's New In PingLookUp?

PingLookUp is a tool for
obtaining the response time of a
website to a specific domain, a
specific IP address, or any
combination of both. The tool
will return an approximate

amount of time spent pinging the site (if it responds to our request) and will output the response on the screen. A single ping takes only a few seconds to complete. This is the perfect tool to use on a busy network to determine where a problem lies.

PingLookUp is a tool for obtaining the response time of a website to a specific domain, a specific IP address, or any combination of both. All you have to do is enter your desired

domain address and let the application do the rest for you.

PingLookUp Description:
