RQ Debugger IDE will add a new single key macro feature to programmers. This feature will be used to insert simple commands such as "M=\$12". So when you press the '2' key, RQ Debugger IDE will automatically add "M=\$12" to your code. If you know the command line, you will understand that this feature is very useful because it will save you a lot of time. At the same time, it will provide you with more options such as

"File", "Address", "Command Line", "Reload" and "Search". RQ Debugger IDE will provide programmers with an editor for advanced users. RQ Debugger IDE provides with different text formatting tools like bullet lists, tables and alignment. Also, it will provide users with a toolbar which will add commands like line numbers, comments, code completion, indentation, auto completion and code formatting. This is a unique feature that no

other debugger offers to the programmer community. RQ Debugger IDE will help programmers to add step by step execution. This will help programmers to debug their code as usual without the need of any external debuggers. RQ Debugger IDE will provide users with a new plug-in platform to debug code. Using this feature, you will be able to debug, modify and test many versions of your code at the same time. You will be able to compile, run and debug your code. With this

capability you will have the same control over your code as a prosumer software developer. RQ Debugger IDE will give programmers the ability to work with encrypted data (PECs) and files. This will allow you to debug code which is encrypted (PECs). RQ Debugger IDE will provide users with many more features like;

- o help with basic initialization of the development environment (Create shortcut, Set project path and so on);
- o using the keyboard to

navigate within the RQ Debugger IDE. o using the code and projects lists; o code and project property editing. o the ability to export the project to different file types; o the ability to import the project back to the RQ Debugger IDE; o the ability to import the project with the existing changes; o to share your code with other users; o to create a log of debug logs; o the ability to set breakpoints and watch points; o the ability to debug files and

processes; 1d6a3396d6
