System Migration Assistant Free Download For PC

System Migration Assistant (SMA) allows you to import/export your Windows Desktop settings and personal files from/to a new operating system (while keeping your data and everything else the way it is). Your Desktop settings and personal files remain the way you left them. You can "just-add" your new operating system and carry over your old desktop environment. Importing may be a one-time activity, while exporting may be a regular routine. SMA first determines which Windows components should be migrated. Some components are automatically migrated and some are migrated/exported manually. Examples of manually migrated components are .exe files, registry keys, and icons on Desktop. SMA automatically migrates the following Windows components: Component Description Start menu Start Menu settings: settings, shortcuts, items, and comments. Start Menu data: desktop folders, lock screen, logon screen, and screen saver settings. Desktop Desktop folders, color scheme, wallpaper, and Desktop Icons Desktop data: shortcuts and items Startup Startup menu Startup settings Startup data: shortcuts and items Quick launch Quick Launch entries Linked applications Application configuration Configurations for your Application Paths, Environment Variables, and System Path Startup programs: After downloading and installing, you will use System Migration Assistant for the following purpose: Migrate your Desktop environment and icons from an old operating system to a new one. Import data and settings from a current operating system to a new one. Download System Migration Assistant for Windows Choose a destination for the downloaded binary files. Migration is started automatically when the computer is powered on and unlocked. System Migration Assistant is powered by Microsoft Windows. By default, the application will not be pre-installed, but you can download it and move it into your "Downloads" folder. Once the application is installed, you can access it from the "Start Menu" by searching for "System Migration Assistant". For more information, please read the "System Migration Assistant User's Guide" on the SMA website. System Migration Assistant may be freely downloaded from this website for Windows 2000/XP/Vista/7 and the latest version: 10.0.0.0. Learn more about our products The ThinkVantage System Migration Assistant (SMA) is a tool that allows you to migrate your valuable settings, information, and data from a current PC to a new one. Import your existing PC settings by using the System Migration Assistant and then export them. This ensures that you will not lose any of your important data, when upgrading or replacing your PC. System Migration Assistant (SMA) is an advanced software system manageability tool. It can perform two tasks: It can retrieve information stored in the registry and/or on the file system, and move it to the file system of a new PC. It can also store settings and data from a target system onto your system. System Migration Assistant can import system information and settings (Windows operating system, applications, drivers, printers, multimedia settings) and export it as a collection of XML files that can be imported into a supported target system. There are many reasons to migrate your system settings to a new PC. You could be replacing or updating your existing system, so that you can run Windows programs and programs that are installed on the new system natively, as well as take advantage of the additional system resources that your new PC may have to offer. You can also save money and time by taking advantage of the additional features, controls, and options that you get by migrating your system to a new PC. For example, different drivers for video and sound devices can be installed on a new PC, if they are missing on the target system. Also, a new PC usually has more memory or memory speed than the one that you use, so that you can take advantage of more memory and faster applications. The System Migration Assistant will also help in the migration of printers, scanners, and other peripheral devices that are connected to your computer. Benefits of System Migration Assistant System Migration Assistant will help you to migrate your Windows operating system settings, drivers, applications, and device drivers on your PC. In addition, System Migration Assistant will help you to migrate the following information: Information stored in the Windows registry Any files stored in your memory or in disk drives (hard disk drives) Any information stored in other data storage device (such as compact disk, ZIP files, and external data storage media) Migration of information from your current computer to a new one is extremely easy, fast, and can be performed in seconds! You don't have to worry
