Layers are arranged over one another, with one layer on top of another. You can move, modify, and combine layers to produce several results and save them for future use. You can create separate layers in different styles, which you can modify independently of one another. When you create a new document with Photoshop, you see at least one layer panel, with the Name, Layer, and Layer Mask icons in the upper-left corner (see Figure 16-5). These tools allow you to name, set the transparency of, and merge layers. **Figure 16-5:** If you click the top Name icon, you see the layers panel; if you click the top Layer icon, you see the Layers panel. To create a new layer, simply click the New Layer icon. The New Layer icon is at the bottom of both panels in Figure 16-5. You can also see the New Layer option in the menu that appears when you choose Image⇒New.

the musings of a wanderer Menu lost Search for “rebel” and “spleen” yields a lot of hits — from the Captain Marryatt novel I’ve been reading, Spleen. The most memorable was this poem, from Baudelaire’s “The Barcarolle,” which I was disappointed not to find in full context, until I clicked on Hugo’s link. An old priest, and the organ of his parish, This one was living in his time and was Loving enough to give holy chimes to the note That struck the heavy bell. He with the barcarolle Enacted the life of the gentle people’s soul, Sparing no sigh, no sob, nor ecstatic blast In uttering the grief that rules the people. He wielded his poem to terrify the priest Who lived to serve the people, and he cried, “Look!” And those who followed me, they found, at the back Of a group of people who all stood grim Before the crowd, three little skulls in a row."The Islamists have done a good job of discrediting elements of the organized Jewish community through the rampant campaign against Israel in the United States," says Daniel Pipes, whose Central Fund for Israel has played an increasing role in defending Israel in the United States. Now the pendulum has swung again -- and Richard Behar, a Howard University professor, says it is time to rethink the Palestinians. "When you see the Palestinian suicide bomber, you realize that you've been fooled," he said. "You're not on the side of the righteous against the wicked, in fact you're with the wicked." Behar's new book, "A New Republic of Minds: Leftist Illusions and the Politics of Identity" (Farrar, Straus, and Giroux), continues his call to rethink and expand the liberal coalition, especially by pushing the idea that the anti-Israel campaign is in reality a left-wing campaign against the West. "This book will alienate many who do not understand America's Jewish world," he said. "I have no problem with that. I can live with that. I feel the world has gone mad, too crazy to talk about." Behar lives in the historically Black colleges of the south but grew up

Covalent attachment of an amphiphilic microsphere to immuno-gold particles for electron microscopic demonstration. An amphiphilic polymer microparticle (Microsphere) was covalently linked to immuno-gold particles to permit three dimensional visualization of cell surface antigen by electron microscopy. Spherical particles were prepared by an ionic-gel process. Modified gold particles were linked to microparticles by an aldehyde as the binding group. The Microsphere conjugate was stable at 4 degrees C in serum free culture medium. Immunoelectron microscopy was done with monoclonal antibodies to the Hepatitis A virus and, using immunogold labeling, the Hepatitis A virus was detected on the surface of Hepa 1-6, hepatoma cells cultured in the presence of fetal bovine serum. The particle-antibody complex was stable for years, making this combination a promising new tool for the study of the surface antigen on malignant cells. As the G-7 met in Canada, democratic movements in Brazil and Greece called for changes to the global order, and to European capitalism. The G-7 group of industrialised countries has long been the de facto leader of the world capitalist class. However, in recent years there have been questions about the capacity of the US and its partners to shape the global order and ensure that their interests are indeed the most secure. As discussed at the weekend, the summit of the G-7 leaders was overshadowed by democratic movements, and the fact that the world’s seven largest economies have so far failed to face up to the political and democratic crisis engulfing the region. On the other hand, the rise of “populist” and nationalist forces – including those in Europe – have exacerbated the crisis of capitalism. Meanwhile, the economic crisis has been deepening. The latest figures for the US and the eurozone have shown that the recession has entered its sixth year. The dollar has recovered sharply against both the euro and the yen, with the Dow Jones stock index falling to a 16-year low. The G-7 is discussing the “global economic recovery plan”, and the fact that the economic policies are being discussed at the highest-level meeting, points to the magnitude of the crisis. Yet, the discussion of the economic crisis has been limited to what should be done by the US, the IMF, and the World Bank. There has been
