We are creative, intelligent and dedicated. we are creating, being and acting. We are living and giving. We understand that problem solving is a team effort. we really care about each other. we work as a team, we really act and live as one. Credentials Have a degree in Arte Y Logica Preferred Freelance Projects Thanks in advance. So thank you so much for taking the time to read this and please click here to contact us. Experience Hi, my name is Grant Weiss and I am a freelance mobile development and marketing consultant. You can connect with me at:During the past several years, a number of studies have described the nature of intercellular communication and the role of growth factors in this process. The overall aim of this project is to characterize the biochemical basis for such communication. The current work focuses on the fibroblast growth factor (FGF) superfamily of proteins which have been recognized as important factors in intercellular communication. The major focus of the project is on characterization of the functions of the unique insulin-like growth factor II (IGF-II) receptor by binding studies and by studies on the effects of IGF-II in cultured cells. Specific cell surface receptors which mediate the interaction of IGF-II with its cellular targets are believed to be of large interest. The IGF-II receptor is an insulin receptor-related protein (IRR-P) that can interact with the alpha subunit of a heterotrimeric G protein complex. The G protein is known to mediate the stimulation of adenylate cyclase. Additional studies will focus on the possible interaction of IGF-II and cholera toxin. There is some outrageous news coming out of Riverdale, and although there are no snaps on the internet, another fun tidbit is coming out of the town itself. The cast of Riverdale has been staying busy filming the season, and they just made their very first appearance on Twitter. The episode was a combination of a crossover and a kickoff to the new season, and since the show has been filming, the cast has kept fans updated on the production through social media. So far, the cast has yet to share any plot details, but the episode that they just wrapped filming for happened to feature a crossover with The CW's other Archie-related series Riverdale which is airing during the same time slot as Riverdale. It seems like 82138339de
