Proton StreamerQ: What exactly is an App Engine task? I am just starting to work with App Engine.

Can someone please help me understand what exactly an App Engine task is and how to use it?

A: In App Engine, a task is just a way to run a script that could potentially block in some way, such as waiting for a long time to check a web page for new content, or a long time to process data. For example, you might do a "count

---

# words" task to count how many words
