KEYMACRO is a free utility for working with keystrokes, commands and hotkeys. KeyMacro lets you record your actions and

switch to an action automatically when you press a hotkey. KeyMacro can record the action in a variety of formats, including ASCII, Unicode, XML and Windows registry. KeyMacro can automatically change the code when you are recording. The program lets you record your actions and switch to the action automatically. You can run as many actions as you want in a recording session. KeyMacro has more than 300 hotkeys, commands, actions and keyboard combinations. It has many utilities, such as filters, preview mode and a help function. A built-in compiler makes it easy to create your own scripts and macros. KeyMacro supports almost all OSs, including Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows 10, Windows Server 2000, Windows Server 2003, Windows Server 2008, Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2, and Windows Server 2016. KeyMacro 6.8 Description: KeyMacro is a Windows utility designed to help create keyboard macros, so that you can press a hotkey, switch to an application or program, or open a file and more. You can create a macro for just about anything you want to do, which is convenient and practical. KeyMacro features: - Shortcuts can be changed at any time during the program is running; when creating a shortcut, you can set it to be either dynamic or static, so you can easily remove unused shortcuts. - Hotkeys can be recorded and switched to automatically whenever you press them. - The program can automatically switch to any application, folder, file or active program on your computer. - Multi-clipboard is supported. You can have more than one set of your macros stored in multiple places, which helps you when creating and switching between your macros. - You can use and switch to multiple shortcuts by defining separate hotkeys for each one. You can specify a new hotkey for a shortcut by simply pressing the desired hotkey or hotkeys, and it is only active for the time you are using the application. - The program supports two different modes: normal and preview mode. In normal mode, every hotkey you create is available for you to use. In preview mode, the active shortcut only appears when you press the hotkey and will disappear when you change to another application 80eaf3aba8
