Patient representatives, physicians, and other healthcare stakeholders came together to discuss the causes of drug-induced liver injury (DILI) and to advocate for the inclusion of a high-priority DILI biomarker in the Clinical Laboratory Improvement Amendments (CLIA) 21.30 and 21.31. Biomarkers are the need of the hour. Although it is known that some pharmaceuticals can cause liver injuries, and that the liver is among the most frequently targeted organs, there are no biomarkers to diagnose or predict drug-induced hepatic injury. This is surely extremely unnatural. It is like a girl rushing to her first date with someone she knows nothing about. (Source: I think "in a red-hot rush" is common in this meaning, but is this an idiomatic expression? A: I hear the expression "in a red-hot rush" several times a day. It's especially common in comedy, and I think is taken from old city directories because the speaker is

describing the very frantic but sincere interest expressed in a red-hot new person. The meaning is, "I'm very excited to meet you, and I'm happy to be spending time with you". It is an interesting digression, but not an idiom. A: The sentence isn't saying that you are in a hurry to meet someone new. It is saying that you are in no hurry whatsoever, and that, due to that fact, you are much more relaxed about it all. `/* -*- Mode: C++; tab-width: 8; indent-tabs-mode: nil; c-basic-offset: 2 -*- */` This Source Code Form is subject to the terms of the Mozilla Public * License, v. 2.0.
