* Adobe Photoshop CS5 * Canva * Gimp Chapter 5 Creating Professional-Quality Invitations In This Chapter Identifying the tools of the trade Making your own invitations Finding great-looking cards When you're at the point in a relationship where you want to get the conversation started by asking your significant other, family, or friends to your place, a professionally designed invitation is a prerequisite. Even if you're presenting a small dessert at your friend's house on a casual get-together or a cocktail party at your apartment to a small group of close friends, you want to make a good first impression. That means your invitations need to be creative, unique, and memorable, and they need to look great. In this chapter, you discover how to use Photoshop to create invitations that are professional in appearance, with the correct level of sophistication, and on a budget that works for you. And you get started on your invitation artwork by creating a template that you can then use when making your actual designs. I also explain how to find invitations that fit your needs and budget. You learn to print your own invitations, and I show you how to shop for cards on the Internet. Photoshop Is a Raster-Based Image Editing Program When you open Photoshop you see a screen similar to the one shown in Figure 5-1. This interface is Photoshop's default view. Photoshop may look like any other raster-based image-editing program, but what sets it apart from the others is that it also offers layers and lots of editing options. Most people come to Photoshop because they know how to create raster images, such as photographs and clip art. These types of images contain pixels as the smallest individual units that make up the photo. The pixels define the colors and shades of each photo. Photoshop also has the capability of creating and editing vector images or illustrations (artwork that is created in a vector format, such as Adobe Illustrator or Freehand). This chapter explains how to create and edit vector images, but first you

Photoshop is the market-leading graphics editor, but you can't use it for everything. Choose the right tool for the job to get more done. Photoshop vs. Photoshop Elements Photoshop CS6 or Photoshop Elements 13 (formerly known as Photoshop Express) The jury is still out on if using Elements is a good or bad idea, but Elements 13 seems like a much better version than Elements 11. It's faster, can edit RAW photos, can use most of the same tools as CS6, and it's easier to find, organize, and edit files. The best features from Elements, including its split photo editing tool, are included. You can use this feature to create a new source file in the app and edit that file as a separate file, or just edit the first image in the sequence you want, then copy the resulting file into a new place in your library. 12 May 2018 09:43 AM By Kamal Ola Three teenagers were killed and a four others injured after a seven-storey building collapsed in a village in Nigeria's Plateau State. A local source revealed that the accident occurred when the youths were searching for a stolen phone in one of the houses in the remote village of Shinkalmu in Konta Local Government Area of the state. The source, who spoke on condition of anonymity, said the boys were inside one of the houses when an upper storey of the building collapsed on them, killing the three teenage boys instantly. The deceased were identified as Asuwa Mudade, 16; Akpo Emmanuel, 15; and Gbrimya Samson, 14. Five other youths were trapped under the debris while three of them were rescued by the villagers. The youths were rushed to the hospital where one of them died while two others were still admitted in the hospital. A team of National Emergency Management Agency (NEMA) and police was dispatched to the village to assist with rescue operations while a technical team of the National Emergency Management Agency (NEMA) was also mobilised to provide light electric generator for rescue operation. The accident comes barely a day after a six-storey building collapsed in Ode-Ekiti, Ekiti State, killing two people and injuring a woman. The incident occurred when the six-storey building collapsed suddenly at about 9pm at the Elegua land in Okokomaiko village under Ode-Ekiti Local Government Area, according to Eyitayo Olumide, the spokesman of the state Emergency Management Agency, OSM. The spokesman said the building collapsed as the owner was constructing another building for his friend. The accident occurred as a result of heavy rain at the time of collapse. The infrastructures in many parts of Nigeria's Niger State continue to vandalised. The infrastructures were vandalised within the past few days, partly as result of Igbo youths go political power. The Igbo youths are presently rejecting their former Governor, Dr. Mallam Ibrahim Gov. Darius Ishaku of Ebonyi State. Some of the

Before training camp begins, we're taking a look back at the previous four training camps to see how players have developed. Just like last time, I picked out a player that I'm surprised went undrafted and how he's performed in the CFL so far. Ryan Dinwiddie, D, Hamilton Tiger-Cats: Interestingly, Dinwiddie had his lowest output of his career in 2017, which is why I picked him here. But after his terrific camp last year, he has continued on that same path this season and is primed to have a breakout year. I am really excited for the season to get underway. Read More: I also selected a player that is starting to gain some traction. We've seen Jorden Nelson, John Gill, and Ryan Smith get some looks before being cut. I think this young group could be a productive group in the back field. It is also possible we see a training camp breakout with one of these guys this year. Tyler Holmes, DL, Hamilton Tiger-Cats: In the more conventional pass rushing depth chart, Holmes has been able to shine with some sacks this year. If we had to compare Holmes to a player that is perceived to be a draft pick this year, I'd say Elijah Taylor. Holmes has the same level of play as Elijah Taylor has in the past in Toronto, while also having a comparable stat line this year. Tyrell Crosby, LB, Hamilton Tiger-Cats: When I have watched Crosby, he's shown versatility, comfort and fluidity when playing in the middle. This will help him with the new motion defence. Like Holmes, Crosby has a similar stat line to Taylor in the first three games. Crosby also did some positive reviews and should be a solid pass rusher in the team's 4-3 base defence. Osenieks, OL, Montreal Alouettes: Last year I was not a fan of Alsa Osenieks, but I actually liked what I saw in the pre-season. Osenieks has been playing much better this year and I really like him. One of my biggest concerns is his age, but he is quickly becoming one of my favourite players in the league. Quincy Ruffin, WR, Montreal Alouettes: With 10 catches for 191 yards, he's been productive fo
