Currently, the standard price for Photoshop CS5 is $699. If you purchase it under the Creative Cloud program, you are offered many features for a reduced price. You may need to purchase another program or use a third-party driver to use Photoshop on your Apple computer. Specifically, Photoshop works on 64-bit computers with a 32-bit operating system. Instead of starting from scratch, using Photoshop can save you time by letting you take a picture, add a graphic to it, and then modify the existing graphic to create a customized version of the existing graphic. ## Using Photoshop in Aperture Photoshop CS5 is a page-based application. That means that you can turn the page to the next page with the press of a button. Any page can be edited so that it can be used in a photo book, Web page, or other image modification project. Figure 7-2 shows a page from the art book I created using Photoshop CS5. FIGURE 7-2: A very simple page from the book _Bird by Bird._ You can download the project files for this book at `www.dummies.com/go/photoshoppedebooks`.
