Software applications (or apps) are usually released as a standalone application, but can also be embedded inside other applications such as Microsoft Word or OpenOffice.org. They often come as a free-to-use "lite" version and a full version. The free versions are called "libraries" and are integrated into these other applications. They may also be sold separately. Examples of desktop apps include TrueType fonts, digital cameras, data management tools and PDF readers, portable media players, and CAD packages. Examples of mobile apps are calculators, GPS apps, weather apps, digital cameras and printers. The iPad is a popular example of a mobile computer running Apple's iOS, which includes the operating system as well as apps developed for the iPad and iPhone. Concept

AutoCAD History The original AutoCAD program ran on the MS-DOS operating system and originally displayed drawings on an internal color CRT display. AutoCAD was originally developed in the early 1980s to run on the MS-DOS operating system and originally displayed drawings on an internal color CRT display. The software was released in December 1982 as AutoCAD, version 1.0. The company originally chose the name AutoCAD after their initial release of the product. However, the decision was changed to AutoCAD in 1986 to avoid conflicts with other software that used the word AutoCAD.[3] The AutoCAD product line expanded to include non-CAD applications such as AutoCAD LT, Windows CADD and N+CAD, which became other successful products. The architectural tools for AutoCAD were revised in the late

If you don't have Autocad installed go to Choose Your Training Destination Our customer service agents are ready to answer your questions! Capabilities & Commitment Power Point Presentation Hannah Supervisor/Manager Training History Ran a number of trainings for managers and supervisors at a local IHOP franchise. I also ran trainings on inventory control, procedures and materials management, and basic excel for general managers. I also have a 5 year background as a fitness instructor for a local gym in the Phoenix area. My Experience I have been teaching at Mattress Firm for 2 years and have had the opportunity to teach many different courses. I have taught Sales, P&L Accounting, Inventory Control, and basic Excel for Managers. As a fitness instructor, I have many skills in teaching small group classes and individual health and fitness. I have been teaching a 7 week, beginner weightlifting class for 2 years. My other main duty is to do instructors for the franchise. I also teach for our referral programs for many fitness centers throughout the Phoenix area. I am currently a NAPF Certified Personal Trainer. Teaching Philosophy I believe that the key to teaching is to put the time into your students. When I was in the fitness industry I found it was not about the best workout or the most efficient workout, it was about the best results and being able to produce the most results. I believe that in teaching the same principle is true for business. Once you have invested the time into your student, there is no reason to not be as effective as possible. I believe that success comes from a combination of common sense, practicality, knowledge, and passion. Teaching Habits I have learned the most success in my teaching careers by taking the time to invest in my students. I don't believe that the hours you put in don't matter, it is the time you put into your students. I have seen countless people quit teaching because they don't get the return they expected on the time they invest. I believe that in business, it is the same. As long as you invest time, effort and passion, you will be successful.
