Introduction In 1990, Autodesk introduced DWG (Dynamically-

Wrapped Graphics), which consisted of a series of extension functions. This software also supported the exchange of AutoCAD Full Crack drawings and allowed customizing, editing, and tagging the Autodesk files. This was also the first product which was based on AutoCAD, after it was ported from DraftSight to the new codebase. In 1991, DWG was renamed as "XDWG" (XDynamically-Wrapped Graphics) and in 1992 the.DGN (Drawing) format was introduced. In 1993, DGN was renamed as "DGN2". A year later, Autodesk introduced the current graphical user interface. With the arrival of the

Windows operating system and the development of the Internet, Autodesk sought to update the existing API. The next generation of API was named APlx. In 1994, APlx was renamed as "APle". In 1995, Autodesk released APle (as well as the APlx's components) to the public. In 1996, the APle's API was packaged into three separate packages: "AutoCAD", "AutoCAD LT", and "AutoCAD 2002". In 1997, the APle's components were split into two separate components: "AutoCAD" and "AutoCAD LT". In 2000, APle's components were renamed as "AutoCAD", "AutoCAD LT", "AutoCAD Architecture", "AutoCAD Electrical", "AutoCAD

Civil 3D", "AutoCAD Plant 3D", "AutoCAD Plant 3D SketchUp" and "AutoCAD Structural 3D". In 2001, the names of "AutoCAD LT" and "AutoCAD 2002" were changed to "AutoCAD Architecture", "AutoCAD Electrical", "AutoCAD Plant 3D", "AutoCAD Structural 3D" and "AutoCAD Civil 3D". In 2003, the "AutoCAD 2002" was discontinued and all its products were consolidated into "AutoCAD". In 2007, the "AutoCAD Architecture" was discontinued and all its products were consolidated into "AutoCAD". In 2010, Autodesk announced a project to develop an entirely new API called "AutoCAD 360" that would have allowed the

integration of all the new technologies in Autodesk's software. This project was abandoned due to the highly anticipated departure of Autodesk
