AutoCAD was originally designed to create 2D drawings for architectural, civil, and mechanical engineers. Today, AutoCAD is used by architects, building designers, construction managers, engineers, owners, contractors, and designers of a wide range of businesses. AutoCAD 2019 R1 is the first major release since 2013. AutoCAD 2019 R1 is available in two editions: AutoCAD LT and AutoCAD Standard. AutoCAD LT is aimed at the entry-level market and runs on systems with Intel Core i3, i5, or i7 processors with Intel HD or NVIDIA graphics processors. AutoCAD Standard is aimed at the midmarket and runs on systems with AMD Ryzen or Ryzen PRO processors. AutoCAD 2019 R1 is built on the same framework as AutoCAD 2018 R1, and users will be able to easily upgrade from 2018 to 2019. The only major functional change between AutoCAD 2018 and AutoCAD 2019 is the new Ribbon UI. AutoCAD 2019 has a new tree structure. The old ribbon, which provides user with a predefined set of tools, has been replaced by a ribbon menu. Ribbon menus are the same across all workspaces, but each workspace has a unique set of tools. Each workspace can hold multiple toolbars, which can hold user-defined toolbars. The new ribbon menus can hold multiple tabs, which allow users to group similar tools in a single location. Core menu, ribbon, and the Application menu remain unchanged. Core menu provides AutoCAD tools and data. The ribbon provides access to a variety of tools. The Application menu provides a framework for tools to be plugged into. AutoCAD 2019 is built on the same framework as AutoCAD 2018 R1. In AutoCAD 2018, we introduced a new component architecture, which allowed AutoCAD to run faster and more stable on modern multicore CPUs. New in AutoCAD 2019 is a component architecture that has been optimized

What you could do though is change the color of the layer and the text. Just go to File->Document Settings->Design and use the color picker there to change the colors. /* * Copyright (c) 2017-2018 THL A29 Limited, a Tencent company.
