AutoCAD has some of the best-known and most used features such as fillet, sweep, and torus. Advanced AutoCAD Users The advanced AutoCAD user will probably need to deal with aspects of programming, modeling, and even painting. AutoCAD has the capability to create specifications, calculate area, calculate mass, and apply other metrics. Design Engineering AutoCAD Users Design engineering is used by engineers and mechanical design engineers who need to model and create drawings to create designs, calculate volumes, and so forth. Common AutoCAD Workflow AutoCAD is a different kind of drawing application than a word processing application such as Microsoft Word or Google Docs. In AutoCAD, the user actually draws a drawing by creating a vector of lines. Users usually start by creating a new drawing by choosing New. The drawing can then be saved and loaded for editing. Once the drawing is created, the user can start creating the initial drawing by choosing a line type. AutoCAD uses a graphical user interface (GUI) instead of a command line.
