What's new:

✓ **Brand new gameplay and story A new fantasy set in a world between two worlds. A long time has passed since “The Legend” ended, and a new era begins. THOUSANDS OF MOTES. It has been a long time since adventure-seeking Primes have added their own style to the trends in the human society following the end of the “Legend.” People lead their lives as they wish, enthralled with building their own dreams, wanting to find their own identity. That is, of course, only for them, for life on Earth has turned into a world of contrasts. The development of the earth’s resources has reached its limit, and the earth is at an extremely dangerous position. In particular, a desire for freedom among children has turned into “I do whatever I want!”. To begin with, I have to say you all know how hopeless life was after the Legend ended. More than that, if you do not know why they have come back, you certainly feel like the world is beyond your control. But, the real reason why we returned is not a mere question of self-preservation. There are more than you realize. The goal of our return is to protect the earth, and thus it requires cooperating in many ways. We need to help children who do not know where they should go find their own identity, as well as those who strive to make the world and humanity a better place. Can the world we want to live in be created by the people who want it? The answer is YES. However, a man who has not even experienced death cannot grasp true life. Therefore, we returned to the Earth and called out to all the Children. Even though we are all children, humanity is making a vital change here. And so it is our duty to guide the children that are thinking of the world. They are the hope of the Earth, and we are the last of a dying species. (Many of you are at the beginning of your life and do not know who you are. I know that I am not the first one to return. I am not a savior. Please do not rely upon me.) Thank you for your cooperation in all your dreams. We ask you to be a bride of destiny in your future. If you do not start to think about it, the world is going to end. Our**

Wolterstorff, well known for his writings on the just war tradition in the Catholic tradition, has succeeded Gibbon as the preeminent "Gibbonian." Holborn argues that Gibbon's time-span surpasses Europe by a very wide margin, and so he creates a world-history. He assigns Gibbon's influence on the development of this new story to a wide array of intellectual influences. He also argues that, contrary to much of the literature on the just war tradition which focuses on specific paradigms (i.e., Augustine, Aquinas, Calvin), Gibbon is to be understood as not just a man of letters, but also a man of letters who is at his intellectual best when he is writing about the Roman Empire. Holborn rejects models of the just war that privilege the

intellectual life, arguing that the ethical foundations of the just war tradition are grounded in a strong theology or Christology, which allowed the emergence of a "Christocentric" tradition which in turn gave rise to a just war tradition." --Katherine E. Chaves, Carnegie Mellon University

Computing, telecommunications and other electrical systems often need to be serviced by a technician in the field. Therefore, such systems have created a requirement for a communication system that can enable such a technician or other personnel to communicate with the system and report status conditions, such as a fault, or initiate remedial action. Such a communication system is disclosed in U.S. patent application Ser. No. 11
