Our hero is so diverse and interesting man. Once the diver has been aboard the ship, its captain send him to the sea in the mission. The diver is given a certain amount of oxygen and then dive into the water. As you know, dive means a lot of pressure and, because of that, your "breathing" will be cut and you will not return to the boat. But the main problem is underwater dangerous predators and bombs. You know what is a bomb? A man-shaped object that is connected to the diver's oxygen tank and explodes when there is no oxygen in the tank. The diver and his oxygen tank are connected to a vessel that moves through the water. When the ship runs out of oxygen, the diver will die of exhaustion. To move through the water, the ship needs to keep a certain speed, if the ship runs out of this speed, the diver will die. The diver is surrounded by two kinds of predators. These predators are sharks with tank, which are flying fish and whales. There is no more air in his tank, his oxygen will be used only to survive. To survive he needs to "swim" across the underwater. It is very difficult to go to the right side because there are sharp rocks, and if you go to the right, you will be dead. If you go to the left, you will get a reward. You get a diamond for that. Underwater Explosions If you die, your diamond gets stolen by the shark. If you choose to get the reward, you get a diamond, but also a bomb gets stolen and explodes. This bomb is the main thing to win the game. There are two types of bomb: underwater and underwater X-ray. The first type of bomb is located at the side of the diver, it does not explode but it damages him. While the X-ray bomb explodes on underwater. The bomb is located at the bottom. You need to avoid them. Underwater Predators The shark and whale are dangerous predators. They are the most dangerous and dangerous to the diver. They are located at the bottom of the sea. They come from the left and right, so you need to stay on the left or right side. If you cross them, they will kill you. Underwater Amount of Swimming You have an underwater manometer that will increase every time you cross the death zone and dive to the bottom. The diver can receive new oxygen tanks, but only in exchange for diamonds. How to

**20 The Ultra Hat Dimension 20** (otherwise known simply as the Hat) is a fictional device that appears in both the Ultimate Marvel comic book series and the Ultimate X animated series. It was created by the Mole Man, and there are numerous variations of it depicted in Ultimate X. Publication history The Ultimate Marvel iteration was first introduced in The Ultimates (vol. 4) #1 (April 2005) as a device created by the Mole Man. It was modified by Spider-Man to enhance his battle skills. The device itself appears in one scene in the first Ultimates #1, shown on the wall of a city street, with a warning label. This version of the device belonged to a scientist named Jacob Wright until he passed it to the two soldiers who would become Spider-Man. It was then abandoned by the two soldiers, who had infiltrated the abandoned laboratory and taken it away from Jacob. It was given to Jacob's wife Laurie before it was stolen by smugglers and found later on the seat of an aquanaut. It was later found by the woman who would become Trish Walker. Later, Arnim Zola obtained the device from Trish, who had entered a deal with the mercenary known as Winter Soldier to obtain it. The device was later stolen by Rhino, revealed to be a former Ultra-Humanite minion. Rhino later reveals that he is no longer a loyal minion of the villain; he is a crime boss who happens to be a supervillain. The device was later recovered by Steve Rogers and the other Ultimate versions of the Ultra-Humanite. It was introduced in Ultimate X #1 along with Kitty Pryde and later was found in the possession of the Ultimates. It has the ability to attach remotely. Fictional history Origin A scientist named Jacob Wright creates a sonic metal-making machine at a government laboratory, supposedly for studying sound waves. However, his wife Laurie, who is late in getting home, overhears the machine in action and inadvertently shorts out the power to the building, trapping her inside. The machine in turn becomes self-sufficient and creates a metal palladium sphere which it attaches to the top of the building. The palladium sphere brings a different scientist, Roberto Kawal, out of a large vat-like tube that has been attached to the metal wall of the building. Roberto's experiment causes him to create an army of clones, one of which serves as the base for the ball. A small robot given
