Darkest Hour will be released for PlayStation 4, Windows PC, and macOS early next year. You missed the previous iteration of the game so I'm willing to cut you some slack. It's still a great game, mind. Glad you like the strategy game, I have to admit that in addition to being an enjoyable game, it also holds an interesting historical record. I'm sure if Hitler and his minions would have continued to win, he would have eventually destroyed the USSR and the rest of the civilised world. Whether they would have won or the US could have done anything to prevent WW2, I don't know. But they were stopped. And if your friends aren't available at the moment I can lend you the game so it's not a problem, even before you start playing. "Progressive? Why progressives should be embraced is totally beyond me!" —Turtwig I think we have so many people with great amounts of time that it's confusing them to play a game like Darkest Hour. So yes, I'm offering to lend you the game and play it with you when you want, at your leisure. Sadly, I'm not the only one. There are several other modders that are currently busy making stuff happen, and they'll send to you a copy of the game at the latest at the end of this month. But note that it'll take some time to get the actual game itself, your credit card details and the rest. "Progressive? Why progressives should be embraced is totally beyond me!" —Turtwig Now, let me tell you, it's a great feeling to play Darkest Hour. The sheer tactical depth of the game is a delight to the experienced strategist. At every turn I feel the need to maximise the opportunities presented to me by the game, while minimising the possibility of a fatal mistake. Oh, and the "AI" side of the game is a hoot, by the way. And thus, I'm now using the latest version of the game. And I'm re-learning the tutorial (again and again, until I get it right). "Progressive? Why progressives should be embraced is totally beyond me!" —Turtwig I think we have so many people with great amounts of time that it's confusing them to play a game like Darkest Hour. So yes, I'm offering to lend you the game and play

A Hearts of Iron game at its very core, Darkest Hour provides the same strategic level of depth to managing nations and their populations. As in Hearts of Iron III, you will play as a specific nation in a world that is significantly more detailed than ever before. The AI is fully capable of handling multiple conflicting situations, and players will be able to make a real impact on the course of events. This allows for a much more strategic Hearts of Iron game that is significantly more engaging than previous titles. Players will have to think about what they want to achieve, and take full advantage of the various diplomatic options available to them. While you can pick any of the 20th century's 20 nations, the large number of historical events will give players plenty of scope to delve into a country's history and interact with a much more wide range of historical actors than ever before. The game is fully compatible with Paradox's previous Hearts of Iron games, but a number of new features will make it a standalone experience. The Strategic Depth of Darkest Hour: Building on the strengths of Hearts of Iron IV, Darkest Hour will bring new strategic depth to players by providing a vastly improved overview of the world map. The improved map view will provide players with greater insight into the various countries in the world, and it will also provide greater support for detailed regional, economic and diplomatic maps. Darkest Hour will include all this new map information in a familiar interface. The interface will be designed to fit in well with the setting and dark nature of the game, featuring maps that are highly detailed and easy to navigate. The new strategic and AI layers, along with the improved graphics, will ensure a much more detailed strategy game than Hearts of Iron IV. There will be an even greater emphasis on diplomacy, with a dedicated diplomatic screen that is designed to make it easy to assess what your allies and enemies are doing. The game will include 4 playable nations: Germany, France, the United Kingdom and Soviet Union. As part of the development process, we've had to create a new logo and rebrand ourselves, and after much deliberation, we've decided to drop the "New" prefix. You may notice a new logo in game. If you prefer the new logo, don't worry, you can switch to it using your mouse (Windows) or keyboard (Mac) during gameplay. We've also shifted to a more streamlined announcement schedule and will be making releases through our social media accounts. We're really excited for you to

What's new in Darkest Hour: A Hearts Of Iron Game:

Need a drink? A cigar? Painted onto a fabulous dinner jacket from Christmas 1941? According to the game's official wiki, Darkest Hour is: "... the extension of Hearts of Iron IV, aiming to provide a more realistic look at the Continuation War than do most of Hearts of Iron games. The game stands upon a foundation of historically-accurate events from the outset of World War II to the end of the war in Europe. The game provides a more realistic look at WW2 at the ground level, and is more based in simulation than narrative game titles." And if you've experienced any Hearts of Iron game, you know how wonderfully simulated the whole affair can be. Then I've stopped reading and I won't give the game a second thought. For those who haven't had that experience, Go here to read my most recent review. I used to play and write about Hearts of Iron 4 only. Then I stopped in 2014. Then I wrote my first Hearts of Iron 3 review in 2015. Then I started the game again, and wrote my third review. I stopped last year. A little of both. Plus a lot of hot tea. After the game's release in March of this year. I got good and paid for my dedication. I started playing the game again. I have played it continually since release. If I don't mention the game in an overview, it is because I haven't played it since release. About Me The opening scene in Yojimbo, Akira Kurosawa's final film, features a rickshaw driver and a travelling salesman living in a mountain village. After a pleasant chat, the salesman utters the line, "You have a visitor." Then he climbs into a rickshaw and the scene cuts to a fast-moving montage with the men driving through the village with all sorts of interesting people and possessions. The camera then returns to the isolated pair, revealed to be Toshiro Mifune and Takashi Yamanouchi, the creators of the film. Slowly, they bump to a lonely grave. In the distance, a bugle is playing "The Last Post." Mifune reaches into his rickshaw, unrolls a scroll and places it on the grave. Yamanouchi pulls out a cigarette and fires it into the grave. And then it ends. With the death of Yojimbo, Kurosawa was
