BitLocker is an easy to use module that provides end-to-end data encryption for removable USB drives. Once encryption is selected, this application verifies the access to the removable media in the context of Windows security. If access is granted, USB-BitLocker encrypts and decrypts data on the USB drive, completely transparently for users. This utility does not require any external third party products. USB-BitLocker is perfectly integrated with Microsoft Windows operating systems (Windows 2000, Windows XP, Windows Server 2003, and Windows Vista) and allows the use of USB drives with these operating systems.
