Story The game is certainly structured in a way that would not be too confusing, rather simple with a very simple layout and maybe a bit of a boring way of doing things, but that's not really that big of a deal because it's a linear sort of game like most Action RPGs. You can see in the screenshot they left you some small breathing room as well, telling you where to go in the world just to add some variety. Graphics They look quite good and are in fact up to par for the kind of game it is, with a great mix of VGA-like and HD graphics for a VGA game, although not really anything spectacular. It's rather good, but definitely not a flashy package, but no complaints as the game is not going to draw you in with much graphics in the first place. There are a few different situations you'll find yourself in, and you'll notice most of the game is not a flashy element, but it's good since it keeps things more grounded. They've left a little humor in there as well, such as in "Lost Soul of the Ring", where the world simply collapses. Sound Everything related to the game's sound, like sound effects, voice acting, and even the music, are all good, or at least above average. The music is pretty bland though, so that's a good plus to the music. The voice acting as well,

is probably okay, but nothing spectacular. Gameplay It's Action RPG. Your going to be doing a lot of random battles where you'll be able to engage anything from small rodents and insects to bigger enemies like enemies on a bigger level. The game will give you a set amount of HP that you'll lose when you defeat the enemies and also have a set amount of AP (or Mana) that you use to cast spells and such. Once you're dead you'll leave behind a body, and then you'll have to heal it. Then you can just fight again and do it all over again. The RPG elements are all there, but not more than usual. You can get new spells you can use, you can level your character up, and you can find weapon crafting and armor crafting and such, but these are all normal aspects of the genre. The level up system is rather easy to understand and simple, so it's not a problem. You can level up your Attack and Magic, which is nice. As for the weapon crafting and armor crafting bff6bb2d33

I'm storing an array in the database using mysqli's session_start(), everything works fine except when I try to get the array using mysqli_fetch_array(). I think I'm doing something wrong when I'm connecting to the database. This is my connection: $connect = mysqli_connect($servername,$username,$password,$database,$port); I'm storing $users[$userid]['name'] and $users[$userid]['email'] in the database using this function: function adduser($userid, $name, $email, $stripeid, $intuitionid) { global $servername, $username, $password, $database, $port, $users; //Check connection if(mysqli_connect_errno()) { printf("Connect failed: %s ", mysqli_connect_error()); die(); } //Starting an object for the user $users = new Users(); $users->userid = $userid; $users->name = $name; $users->email = $email; $users->stripeid = $stripeid; $users->int
