Developers introduced the new HyperMotion Technology last week at the E3 showcase. A series of videos were shown showing off the new tech (which is exclusive to the Xbox One). Here is what FIFA HyperMotion technology is all about. FIFA Skills Academy In March 2013, EA announced the "FIFA Skills Academy" which is a new service that will allow players to watch real-life players in action and give them tips on how to improve and hone their soccer playing skills. Official Videos Saturday, 4 September 2013 I'm Sam. I play games and write about them here, on this blog. I am currently looking for people to play with, so feel free to get in touch! I've been very fortunate in that my girlfriend is a very good sport about all this, and has supported me by bringing lovely gifts to keep my family and friends happy while I spend hours in front of a computer. She's probably the only reason why I'm even doing this blog in the first place. But I digress - the reason I write this is to introduce myself and let people know what I do. I also want to give a bit of a bit of background to me and my relationship with games, so if anyone is interested in finding out more about me they

can check out the 'about' tab up above. My favourite games are of course the Mega Drive/Genesis style; I also like PC and the odd handheld. I prefer RPGs, Strategy games and Psychological Horror. I'm always up for a good party game. I'll likely be playing the majority of these games on the PS4, but I have the PS3, Xbox One and Wii U so they may be played as well. You can get in touch with me here. I'm always more

FIFA 19 is the most authentic football game. Starting with how the ball behaves, passing and shooting have been totally revamped. As with real football, players are affected by their physicality, meaning they no longer stop and start when tackled or go into the sky when fouled. An all new depth of talent ensures authentic player personalities shine through. Unprecedented player intelligence unlocks a new level of gameplay, with dynamic, unpredictable and human-like behaviour. They are more tactical and will dynamically adapt their style to the challenge they face, in and out of possession. The best player on the pitch also delivers the best attributes from the moment he steps on the field. Features: Powered by Football A brand new video engine recreates the feeling of total immersion in the world of football. New

animations and fluidity are applied to all physical interactions of players, making them lifelike and real-time. A new gameplay system is based on the most authentic and realistic physical aspect of football players: the rules of contact. Players no longer stop and start when tackled or go into the air, instead they will react to every single challenge, instantly adapting their game play. Every touch of the ball has consequences and players who are skilful can beat the challenge they face by anticipating the next actions of their opponent, even in the most complex situations. All-new Faces All players have been updated by the addition of 59 new models to take players' appearances more realistically into account. Thin over the top hair and ultra-tight clothes that reflect how players want to be perceived. Matching haircuts have been replaced with more natural hairstyles and realistic facial features. Unprecedented Player Intelligence Saves are now re-attributable to the player, meaning that the player can go into the game just as if they had played the previous day. Players will react to the events happening around them with the help of a new system called Football Sense™. New game mechanic Smart Dribble Experimental and never seen before, the new dribble system allows you to dribble the ball more freely. You won't see the ball suddenly disappear into thin air as with the previous dribble mechanics and, when you try to pass and get a run on the opponent, you will

create more space and more options on the field. A new system that could use the Ultimate Team game mechanic,
