Using this data in the game, and some of the world's most renowned football coaches, players and scientists in tandem with our gameplay development team, FIFA 22 is driven by intelligent AI, which incorporates this data to drive the sport's emotion throughout gameplay. The specific details of the new technology are also kept secret for now but we've obtained some exclusive information about a few of the features on offer. FIFA 22 will feature: >> As we were preparing for FIFA 21, we listened to feedback on core systems. The one thing we heard over and over again was that it is key to make FIFA feel like a real football game, so we increased the speed of the ball and we now have more speed in the match. >> We also took a hard look at the pace of the game. Not only were we looking at the speed of the ball, but we also wanted to make sure FIFA supported high-speed play. We've increased the number of tackles, and combined this with the speed of the ball and the increased pace of the game, we've managed to increase player reaction times to a level that replicates a high-speed game, even at the highest setting. >> We wanted to make sure that every moment of every game felt like a football match and felt as fast as a real football match. Because of this, we didn't want to use something that was gimmicky and didn't feel like a football game, and you're seeing the result of that. We've managed to increase the speed of the ball and create some of the fastest football matches that we've ever made. >> In the game you have the 'Intelligent AI' system, which is the core of gameplay. The DICE engine has a rigid structure. The AI is a major component and we had to make sure that it was intelligent enough to manage the game and make sure that the game felt like a football match. When we looked at how we can bring the speed of the ball and the authenticity of a football match into the game, we decided to include some of the high-speed elements we talked about. We've managed to use a rigid structure and the DICE engine to create the fastest, most authentic football match in the history of the series. >> We've also managed to implement a number of different systems that allow us to capture
