But what's not lost on us at the WSJ is that younger Americans are being left behind. In the spring of 2004, as law student Matthew Miller stood on the steps of his Massachusetts apartment building, he didn't worry about what the family would be paying in rent. "I'll be in a slightly better financial situation," he recalled, and he was thrilled to be studying at Harvard Law School and working at a law firm. Since Mr. Miller took up residence in his apartment in September, rent has risen by about \$125 a month. Today, with a job lined up, he plans to move out of the apartment he shares with another student, buy a car, and spend less time commuting to work and more time with friends. But he has a long way to go. Millennials are pulling up roots in a big way. Having just hit the housing market, they are snapping up more homes than the boomers did. But they are also getting squeezed. The 2001 recession saw young Americans unable to get mortgages and home-loan debt rise to its highest levels ever. Eventually the economy recovered. By the time the boomers arrived on the housing scene, mortgages were no longer so dauntingly expensive and home-loan debt had fallen. With inflation and credit costs all in their rearview mirror, boomers started looking for places to put down roots. Between 2000 and 2005, the number of homes purchased by boomers jumped by 28%. Millennials, on the other hand, have only moved up about 50,000 since 2004. "The lack of access to affordable homes is a symptom of this economic slowdown," said Stephen Brobeck, a researcher at Boston University who studies this demographic shift. "It's also a symptom of the aging of the population and the fact that boomers are reaching the end of their careers." None of this is lost on Mr. Miller. "It's very different," he said. "I'm 21 now and I'm moving to a more urban environment, and making ends meet in a new place is a lot different than it was 10 or 15 years ago." This is why he has to keep looking, whether he's working at a firm, teaching at a university, or taking summer classes to keep ahead. **YOUNG PEOPLE EAGER TO BUY HOMES** Millennials are trying to avoid student debt, which they can't deduct on their federal tax returns, while the boomers are concerned about retirement. Adding compound novelty to the everyday: Mental illness and the social dynamics of group therapy. Drawing upon the sociological literature on collective action, this article suggests that the essential nature of schizophrenia may be its impermanence: It is inherent in its episodic nature that individuals may not be able to stay (be stabilized) on their medicated regimen or that individual vulnerabilities may resist treatment. Using ethnography of a mental health day treatment facility and interviews with staff and patients, the article explores the social dynamic of group therapy and how this serves to diffuse and ameliorate the effects of both the schizophrenic episodes and the side effects of medication. The article shows how, by defining schizophrenia as a mental illness rather than a medical disorder, the dynamics of group therapy are altered so that the treatment outcome is determined by the social dynamics of the group rather than individual attributes.
