Play as one of the pantheon of five gods, each of whom has powers that allow you to shape the world around you. How you play determines the character of your god and the story of your adventure, including what alliances you form, what secrets you discover, and who you find to be your companions. About Kyle Marquis: Kyle Marquis was born in Montana and now lives in Nevada. He is a writer, a crafter, an artist, a musician, and a graduate of the Clarion West Writers Workshop. He has worked on The Ellen McRae Night Soil Trilogies, the Katharine Kerr's Speculative Fiction Magazine series, and numerous short stories, a book of poetry, and two interactive novels. His writing includes non-fiction for several audio series, game design, and art. His writing is inspired by his interests in ancient history, literary conspiracy, magical folk lore, romantic fantasy, retro-futurism, and The Goonies. Find him online at www.kylemarquis.com. "Unusual and compelling, like a lovely online serial novel told in extensive detail with a handful of key decisions that control the plot." "Anchored in a rich setting, this is a choice-heavy experience with plenty of character development." "This is a great little game and I think it does a wonderful job of presenting a very mature setting and story for a very young audience." About This is a free and open-source choose-your-own-adventure game, meaning that if you so choose, you can stop whenever you like, re-read your choices, and change your mind. When you do make a choice, you can change it later. If you've played text-adventures before, you know what to expect. If you've never played before, you'll learn the basics. My hope is that this will be a good introduction to computer games for many people, particularly teens and young adults who often find games intimidating. History This was the first text-adventure game I made. It is an educational game for middle school students, and quite possibly younger. It has been used in various art classes in middle and high school. It has also been used as a real-life

What's new in Train Simulator: Southern Pacific GS-4 Loco Add-On:

Sentinel of the Multiverse Corrupting Power Relics are artifacts that dwell deep in the nest of the Infernal Masters. Once filled with Wightblood, they are placed with vulnerable and oppressed Servants. After release from the Wightblood, the artifacts are nearly unstoppable, and the successful Servant gains new abilities and curses, the permanent corruption of which will turn the Servant into a twisted hunter that serves the Infernal Masters and their minions. Arcanist Tarras the Starslayer Most powerful force of the Maelstrom - the heavens themselves may be on the edge of exhaustion, but the Celestial Halls still stand, and its sturdiest of magic shows no sign of wear. Penetrating the eyes of time to arrive in the past, present, or future, the Starslayer seeks to crush all who stand against him. After constant use, the weapon wear away and the magic around it begin to flare. The next effect may be anything from merely fatiguing the user, to a burning damage over time from the magic, to something more dire if the weapon is allowed to pierce its host. The Infernal Mages Strange spirits, trapped within powerful artifacts, and the temple that keeps them constrained. Disbelieving even their own kind, the Mages seek to free all they can. Sometimes, the spells and abilities do not work so well, and the spirits attempting to reestablish free will get trapped to the engine known only as the Book of Fate. Many sealings begin as something innocuous (a Prison of the Fugue), but rarely end well for the Mage. Illumarim of the Abyss The creatures that dwell within the shattered dungeons of the dungeons of Yithgar have a kind of feral nature that causes them to seek power in whatever they can. To these savages of the Desolated Depths, even a Blood Dragon is worthy of worship if it can grant access into the Maelstrom. To those that come to these prisons in death, the realm of soul-destroying Chaos seeps into the soul of their prison, twisting and mangling its way through its arcane fog. For many this is a potent word, and many would give up their life just to have it printed below them. For those who would make a terrifying rogue, aspiring evoker, or nailgunner, it is a question of 'What's the worst that can happen?' The death penalty is without a doubt the worst. To turn yourself in, it is
