I am new to functional programming. I've been studying Haskell but I am confused in the following piece of text: "Functional programming languages are powerful tools for problem solving because they encourage the programmer to avoid side effects and ensure that all computations are performed in a well-defined order. These attributes make it easy for the programmer to reason about the correctness of programs. By avoiding side effects, functional programming languages such as Haskell, OCaml, and Standard ML avoid many possible errors that would otherwise occur in an imperative programming language. However, such languages cannot guarantee that a program will compute the correct result if there are errors in argument order. A compiler that may warn that an argument is not used." Can somebody explain the above? I don't understand the boldfaced part. Here are some context snippets: "Functional programming languages are powerful tools for problem solving because they encourage the programmer to avoid side effects and ensure that all computations are performed in a well-defined order. These attributes make it easy for the programmer to reason about the correctness of programs. By avoiding side effects, functional programming languages such as Haskell, OCaml, and Standard ML avoid many possible errors that would otherwise occur in an imperative programming language. However, such languages cannot guarantee that a program will compute the correct result if there are errors in argument order. A compiler that may warn that an argument is not used." A: "Functional programming languages are powerful tools for problem solving because they encourage the programmer to avoid side

Tom Coleman is a mobile home specialist with over 30 years of experience working with roofs and roofs and drainage systems, serving clients throughout the United States, Canada and the Caribbean. He has provided expert witness testimony in numerous matters before the Oregon State Board of Contractors and, in the event of a major storm, assists FEMA with damage claims. He is the founder and president of Coilhouse, a mobile home delivery company he operates in Portland, Oregon, that specializes in recreational vehicles. His technical expertise is matched only by his skill as an automotive and professional photographer. In 2000, Coleman partnered with Lynn Vassey, AIA, LEED AP Certified, to form an air-conditioning and heating contracting company. . Coleman holds an AIA-CC-ID Residential Design and Construction Designation. His professional experience, technical expertise and analytical skills are featured on pithy and informative design and construction web sites such as PDRim.com, Coleman has been a frequent speaker at industry-related conferences such as CMAA, HTA, and AQCC. He has been selected as a 2012 MHA and 2012 Contractor of the Year by the GCI. He has a broad background of references in the fields of construction and building technology. Coleman has worked as a field engineer and project manager, as an assistant professor teaching architectural drafting and building technology, and as a construction manager and project manager. On August 4, 2013, Coleman was selected by AIA Portland to present a seminar, "Green Landscaping: An Alternative to Lawns," to their 2013 Green Awards Winners. As a member of the Green Roofs Institute (GRI), Coleman is a frequent contributor to The GRI Bulletin, "The Voice of the Green Roof Industry" Coleman lives in Portland, Oregon, with his wife, Deborah, and children, Trevor and Sarah. Name: Lynn Vassey Overview: AIA Seattle, WA AIA Seattle, WA Bio: Lynn Vassey, AIA, LEED AP Certified, is a registered architect with over ten years of experience. Previously, she worked as a project designer and manager with her own firm where she prepared architectural and technical documents including plans, specifications, building information models (BIM), and cost estimating for construction and renovation projects. She is a registered interior designer, registered landscape architect, and a certified LEED Green Associate and AIA Accredited Professional. Vassey earned a bachelor's degree in Fine Arts
