The 2019 ball also features new visual cues that capture how players move their feet and their movements on the ball. Additionally, new stick icons make it easier to visually see the pass outcome, as well as simpler, more visual-based defensive transitions. Below is a breakdown of FIFA 22 key features. Key Features and Improvements Over FIFA 21 Motion Capture - FIFA 22 introduces HyperMotion Technology, which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. As a result of our partnership with MotionReal, the ball in FIFA 22 feels incredibly realistic. It also features new visual cues that capture how players move their feet and their movements on the ball. Greater Player Possibilities - As part of this technology, the player can now use many more tool motions - from jinks and flicks through to dribbles and feints. Player passes, headers and throws also work much more naturally in FIFA 22, allowing for a more open and fluid passing system. Real Player Atmospheres - Also part of this technology, player movements on the pitch can evoke multiple different atmospheres, from the player receiving a pass to a tackle to a goal being scored. Players will now understand the context and emotion around each situation and know how to move in reaction to them.

Player animations are also more responsive, allowing them to react to each other and their surroundings. New Ball - The official ball in FIFA 22 is the Adidas Telstar X-Power 20, FIFA's first official match ball. The Adidas Telstar X-Power 20 is comprised of 20 unique touch-responsive panels and 20 removable panels, resulting in a ball that delivers an unprecedented soccer experience. Real Player Player Equipment - Players, and their clubs, will have the ability to make an infinite number of clothing items and equipment items, or "Irons," to better define their player. For example, players can now make a customized suit to fit their personal style. All custom clothing and equipment in FIFA 22 will move and deform according to the player's body shape and fit perfectly around them. FIFA Gameplay Experience Optimized for Mobile - As technology changes, FIFA is adapting to these changes by creating more and
