Play thru the story mode with the default Entrance Customization. When the match starts, change the stage and entrance setting by tapping on the entry stage, then press the button to create a new entrance effect. You can also see the list of changes and their effects on the next screen. The same settings will be saved. This customization tool can be used on any match by default. (except Championship) And you can save up to 3 custom images at once. All the customizations are saved on the current game file. When the game is over, you can reload the saved data and continue from the point when you save, by tapping "reload". After this, you can also restore your customizations. Please play with the settings up to your preference. COPYRIGHT DISCLAIMER © © Nintendo. I do not own the game. I do not condone the use of the WWE name in any way without proper credit. This is a fan-made entry and do not use anything from the actual games. I bought the game about a month ago and the wrestlers were from the vault even though I added them in the game (with different names that I did not use) and it works great and I love the idea of being able to customise the wrestlers from the start. I bought the game before the arcade came out and as such my install was on v3.0. Well since my system crashed on me because of the arcade I have

## **Path Of Kami: Prologue Features Key:**
