Web surfing was the side-show, as far as games were concerned, these days, it is no different. If you were to use mobiles and tablets to surf the web, sooner or later you may end up playing a game or doing something else, but after that is done, your phone still has some time to play a game. What makes a game special to a user, if not the shiny graphics? Animation, fluidity of game play and having fun are the features a user looks for. The market is slowly but steadily growing and as more and more devices come out for gaming, more and more gaming apps are being added. With that said, lets see how games on the web can be transformed into what is termed as "digital gaming". Are you fed up of running all the time? Is it boring to do the same thing everyday? With the gravity gun you can move objects, flip gravity to your advantage, and control the flow of time. It's the perfect weapon to solve puzzles, find

secret areas and hit enemies! There's no time limit but you are only given a few seconds to solve each puzzle. That's why you'll need to plan your next move carefully. Time you spend playing won't be wasted on cutscenes, so explore the game at your own pace to find the answers you need! System Requirements For Police Patrol:

At a first glance, it is a game for those who are into shooters, and not for those who enjoy adventure games. But I am here to tell you, that is a mistake. Plus, there are a lot of weapons and armor that you could choose from. In short, this game is a shooter with a
