Elden Ring Features Key:

THE ELDEN RING: A Huge, Open Field Rich with Exploration

MINIGUNS, BATTLES, AND BOWS: Dynamite and sharp weapons abound!

AUTO-MOVING UNICORN: Different from mounted battles, mounted evasion is available even for unmounted players.

MAGIC, CASTING, AND EQUIPMENT

AI ALL-OUT BATTLES: Acquire a high level of magic to fiercely attack and ward off attacks from the enemies.

UNIQUE POINT SYSTEM: Gain strong points from each stage according to how often you fight in three-staged dungeons.

NON-LINEAR PROGRESSION: Create and play your own monsters to watch how they grow and function in stages.

HIGHLY CUSTOMIZABLE CHARACTERS: Although there is a high level of freedom in customization, the freedom still goes even beyond what is possible in games such as Dragon Quest!

LARGE ENVIRONMENTS THAT RECEIVE YOU BACK TO YOUR HOME: Confiscation will not occur in a story adventure built to please you!

PROJECT WORLD PROJECT WORLD: This game will launch the world project, a large-scale, ongoing, world-building project, via the world.project.com portal! This will also provide information about the

Tarnished World.* *Player movement is available in the open fields, but the equipment and action that is available may differ.

User reviews: ID: Hexus: What players think of this game: Owen: It's like... Fire Emblem - The Game - but with some silly fantasy bullshit going on. Actually, that's a really good description of the game. The art style is the strongest part of the game. It does something very nice with contrast between the beautiful, sometimes foggy landscapes and the garish looks of the enemies. The characters are the weakest link though. The nooks and crannies of your character's face aren't obvious enough to make them look intelligent. They just look like silly cartoons. That said, I found the combat to be very frustrating. There is no auto-targeting and it's quite clear when you miss. The combined shortcomings of it being very twitchy (especially in combat positioning) and slow result in some narrow, though not unenjoyable, combat. The combat also works very well in the group system. The whole point of it is to give your characters a good chance of hitting, and letting you coordinate attacks and dodging between everyone. This is all done very well, and the way it's done where it's the whole group that does the attacking and dodging is both interesting and fun. That's the meat of the game: working together. The game is definitely built around that, and it's a shame that it doesn't have anything beyond that, even in the end. Most of your quests just involve going around looking for the next quest marker and there are only a few different enemies in the game besides the end boss. I don't mean to be harsh, I really did enjoy my time with it, but it's just not really what the game is about. There are no long-term effects, and it seems like the actual reason the game exists is just a series of little story beats and events to keep you busy. It's a shame there isn't anything better here, since the combat system works quite well. The game world is a bit of a cute idea too. It's a little bit like Earthbound, the world is just a fair bit more elaborate and things are just a little bit nicer. I like the little details, like having a campfire to keep the cold away. The tiny, little details add up to make a world that feels like it's been crafted by a master artist. The Elder Scrolls games were bff6bb2d33

Editors Note:

Accused of being more into MMORPGs than I was, I've begun investing more time in this title. I think it's well worth the investment.
