Hi guys, I wrote a program called "Isengard" and I'd like to post the download for it. The name is Isengard because it was a concept named "Nubia", however it had too many problems with the launch and I had to change it. Features: - It sends reminders to your friends about events related to them or your events - It can block your mobile number from being contacted by mobile apps - As the name says, it has the ability to make your messages or audio recorded more significant and clear - Has an alarm function to wake you up in the middle of the night when you're asleep - Allows you to customize the color of notifications and the volume based on your preferences. - Has a "personal security mode" where you can block your number from being blocked from mobile apps - When changing themes it will change the colors of the buttons and also the text of the notifications - There's a program that allows you to clean up your phone and completely unrooted it without even having to install Titanium Backup - It has a gift function that will make you send an SMS or message to your friends - It can also create a free account on Facebook and Twitter and post on your timeline to inform you about any update to the app - It has the ability to block individual numbers or blocks all numbers on a country - Can set a basic profile and change the language of the notification. - And of course it doesn't block any number Hi guys, I wrote a program called "Isengard" and I'd like to post the download for it. SmallPea WinTop License Code & Keygen

Introduction: SmallPea WinTop is a feather-light and portable application with a very simple purpose: it can help you make the windows of any third-party programs stay on top of other frames. It doesn't include complicated options or configuration parameters, making it accessible to all types of users. Just click and run Since installation is not necessary, you can drop SmallPea WinTop's executable file in any part of the disk or on a removable storage unit to directly launch the app on any computer, without having to make previous setups. More importantly, it doesn't add new entries to the Windows registry or Start menu, thus leaving no traces behind after its removal. Make windows topmost, kill apps, and view hidden processes The GUI consists of a small window with a clear-cut structure, where the titles of all active applications are shown in a list. All you have to do is select a window a click a button to make it topmost. Alternatively, you can reset the window, end the corresponding task if the process is no longer responding to commands, switch to the program, or refresh the list. By default, the app hides processes (such as DLLs) but you can show them instead. Moreover, you can make SmallPea WinTop stay on stop. Apart from the fact that you can consult a help manual, there are no other notable options available here. Evaluation and conclusion The software utility worked smoothly in our testing, without triggering the operating system to hang, crash or display error messages. Its impact on the PC's overall performance was minimal, since it needed low CPU and memory to work properly. On the other hand, it contains only basic options that don't satisfy the preferences of more experienced users looking for customization options. We must also keep in mind that SmallPea WinTop hasn't been updated for a considerable amount of time. Nevertheless, it gets the job done, it's simple to use by anyone, and it's free.Q: How to change the formatter of a report in Jasper Reports? Is there a way to change the formatter of a JasperReport generated with jasperreports-maven-plugin? I want to use floating-point numbers for my field, but JasperReports uses the old fixed precision. A: You can change the class used to generate your report's underlying text to a more appropriate floating point class. You can do that in your pom.xml file
