Google's SketchUp Google's SketchUp enables users to construct 3D models. It is a CAD-style program that enables users to build virtual models of anything they want without the limitation of only using photo references. It is also inexpensive and easy to learn. One of the unique selling points of this program is that it gives users the ability to fly through their model and zoom in on any location and view it from all angles. It also has a comprehensive set of tools for creating solid models, as well as blocks that users can cut and arrange to create their own textures. Google SketchUp does not support layers, only a one- or two-dimensional view. The files can be stored in a variety of file types, including both MS Word and PDF. * SketchUp * Sketchup.com - Mac * SketchUp.net - Windows

Q: XSD Repeating Element - Include element inside of the repeating element I have a repeating element in XSD which should contain an element like this: name1 Type1 1111 name2 Type2 2222 But the result would be: name1 Type1 1111 name2 Type2 2222 How can I include into automatically? A: I found out that without specifying extra attributes to the element, there is no way to do it. Hello all it does not matter what engine you use, but it is one thing to get it to function (or not) and another to get it to power up. Use the suggestions below, and let us know where you get stuck - I used one of these with rt2400, and was able to get it to power up - even though I did not bother to finalize the modules (using vendor default values instead). Let us know what you end up with, and if you get it to function - even if it is using modules you built yourself. Hope this helps good luck Danno [I've included some links, though I've not tried these myself yet, but do not be deterred. You will need a way to get to the site, I imagine, but good luck, and let us know what you end up with - I'd be interested in reading about the results.] Simple DIY

I am very happy to announce that! Tanya Rudzik will give a great talk on “Polyamory in the Young Adult Lit and Film” at the upcoming “Going Raw” foodie get-together which will take place on Saturday, March 15th, 2015. Tanya has a considerable following on Facebook and on twitter (@tanyarudzik) and her blogs, (I Am A Polyamorous Woman.) Myself, I love her style which is very “author-ish” (like this one for example) and sometimes even more unusual. Tanya speaks from her own experience, and both her and her husband, Dwayne, have a very easy going attitude to everything they do, they are lovely people. Many people have requested a podcast about Polyamory that I released on Dwayne and Tanya’s Poly podcast in October. If you miss the podcast you can get the podcast back on iTunes from this link Polyamory in the Young Adult Lit and Film Tanya has been interviewed on a number of podcasts including This American Life, In the Light, Geek Speak, and The Real Egyptologists, but of course, I’ll get back to her on Preeti’s Pooja Show. We look forward to having you there at “Going Raw”, in any way you can come, if you can. “Going Raw” is an annual event which takes place

in my home on the first Saturday of each month. Since I am really missing the beach at the moment I would love to have a Santa Monica type beach get-together so I can bring my dog Waffles along. If you would like to connect with Tanya or Dwayne or to “go raw”, please feel free to connect with them on the following places: Twitter: @tanyarudzik Facebook: Blog: It’s going to be a real treat to have a polyamorous talk and meet some of Tanya’s friends. ? Thank you for making this possible. Darryl
