Hey guys, sorry for the late review. Well I've had something other than photography on my mind for the past while now. When I saw this software, I couldn't believe what a small company could do. I used to use Windows Live Movie Maker a lot and thought it was great. This is like that but better in my opinion. Tagging You've seen movies where they give nicknames to the movie characters (Big Fat Albert) or tag the actors. Well the tag tool in this software does much more. You can tag a whole bunch of photos in one click. Tagging photos is a simple affair. Just select a photo and click on the Tag button. You can rename the photo after tagging it. If you want to delete the tag, just highlight it and click on the Delete button. Bookmarking This is what the software does best, you can create pages in a flash. Just type the title and click on the pencil to continue. This creates a page that you can tell the software to bookmark. You can select any photo or folder to add to the page. Export You can export your photos and movies as a zip file or as a folder. The default folder is called Movies and is located in the Pictures folder, so it's easy to keep in sync with your hard drive. Hulititsy - 3.0.1 Hulititsy is a free digital photo album creator designed to help you organize and display your pictures. Sudiptics Sapphire is an Internet browser that allows you to play your favorite videos directly from its interface with as little effort as possible. Neat and intuitive interface There is nothing complicated about this tool. Its interface is simple, clean and straightforward, with all of its main features and functions displayed in the toolbar present at the top of the main panel. You can hide or show the toolbars (search, links, quick tools) at any time. Bookmarks and homepage It's needless to say that the URL has to be entered in the dedicated field on top of the window. Once accessed, a page can be labeled as a favorite by saving it to one the 10 available bookmark slots. However, in order to activate (save) the bookmark, it must be used at least once. The program has a predefined list with bookmarks that take you to the main page of some useful sites, such as Wikipedia, Yahoo, YouTube, MSN, and Microsoft. More than that, it lets you set any visited page as the homepage with just a click of the mouse. Searching options Sudiptics Sapphire makes use of both Google and Wikipedia to display your searching results. Simply pick a location for displaying these results. The integrated video player enables you to load files with various formats, such as 3GP, AVI, MPG and MP4, or play content directly from an URL. It features just some basic functions, such as playing videos, pausing, resuming and stopping playback, as well as loading the next video. Last but not least, it supports multiple tabs and you can print the pages that you are browsing. Last few words Taking all things into consideration, Sudiptics Sapphire proves to be a useful software tool that enables you to browse the Internet and play various videos from your hard disks or from URLs with little effort.
