is a very famous movie which is released on 3 July 2019. Hey Ram is directed by Kamal Hassan. The movie has been produced by Kamal Hassan and Kumar V. Kumar. Written by Kavya Madhavan, the film features Shahrukh Khan and Saket Ram in the lead roles. Hey Ram version, which is the Hindi dubbed version of the Telugu language film of the same name. The film is based on the partition of Bengal. for quantum proton contribution to $\Sigma \rightarrow \gamma + b$ decays. Also, the contribution of virtual photons into different contributions to $A_{\text{FB}}^{\text{had}}(e^+e^-)$ is another interesting issue. Note also that here, in contrast to $\Sigma \rightarrow \gamma + Z$ case, we take into account only the photon contribution. In principle, it is necessary to investigate the contribution of other partonic subprocesses into the total cross section, that is, the ones which lead to the decays $\Sigma \rightarrow \gamma + d$ and $\Sigma \rightarrow \gamma + u$. However, such investigation would add to the cumbersomeness of the approach. Now we apply the approach to the photon contribution to the $\Sigma \rightarrow \gamma + b$ decay. We will study the partonic subprocesses only: the photon-gluon fusion and the quark-antiquark annihilation. We should add that the calculation of the photon contributions into the $\Sigma \rightarrow \gamma + b$ decay is rather straight-forward, it is done in the standard way [Agashe_Zbb; @Serbo_Zbb]. In order to provide the full amplitude, we should also calculate the subprocesses with internal photon emission: $\Sigma \rightarrow \gamma + g + q$. However, such calculations are much more tricky. Generally, the interferences between diagrams with and without photon emission will involve the photon momenta in a more complicated way. However, in the one-loop approximation, there is a possibility to avoid the estimation of such terms, which is related to the fact that the photon does not couple to a gluon. The equivalence theorem allows us to use the pure QCD result instead of the full one-loop amplitude. In this way, we can construct the contribution of the photon-gluon
