UniRed Crack Free Download [32|64bit]

UniRed is a Windows application designed to help you create and edit Unicode text documents. It comes loaded with standard and advanced settings alike to please all types of users. Simple installation and interface After a brief setup procedure that shouldn't give you any trouble, you are greeted by a user-friendly interface, where you can open TXT, INI, HTML, XML, Pascal, Delphi, C or C++ files, as well as select one of the numerous charsets supported, in addition to the surrogate. Open and edit Unicode documents

Multiple tabs are supported, so you can open multiple documents at the same time and easily toggle them. It's possible to convert selected text to uppercase or lowercase, wrap text, enable a spellchecker, as well as conduct search-and-replace operations in simple text or regular expression mode. What's more, you can look for a specific word or pair, jump to any line, synchronize the structure, switch to another UI language, customize font sizes and colors along with

syntax highlight colors, save the window size and position, as well as run code. Evaluation and conclusion We haven't encountered any problems in our tests, thanks to the fact that the program didn't freeze, crash or prompt error dialogs. It had minimal impact on the overall performance of the machine, thanks to the fact that it needed low CPU and RAM to work properly. On the other hand, the interface requires some improvements in the visual department. We must also take into account the fact that UniRed hasn't been updated for a long time. Otherwise, you can test it for yourself if you're looking for a Unicode file editor. How is it? Stephen UniRed Download About UniRed UniRed is a Windows application designed to help you create and edit Unicode text documents. It comes loaded with standard and advanced settings alike to please all types of users.
