- Game to be released on Steam and is currently available to be downloaded for free. - The game will be free to play with a balance of a RPG and a sandbox (with a focus on RPG, but the sandbox is also a big part of the game). - The UI is designed to be beautiful and intuitive. - 5 to 8 hours of gameplay for each of the 14 characters, each of them with their own story to explore. - You will unlock new characters through the game, unlocking more content to play with. - Discover the unknown, and explore the meaning of life through adventuring. Don't be afraid to tell me what you like and what you don't. Don't hesitate to criticize. Your feedback and suggestions are highly appreciated! you already have written here. Lowlights It would be nice to put in all of your ideas here, but it's a little daunting and overwhelming, as well as unnecessary. Make your strongest point first, and you can address everything in detail. I recommend focusing your first post on what you like and don't like about the game. If you love the character creation, give your reasons for it. If the quest lines seem dull or repetitive, you can add that. If the graphics aren't to your liking, you can mention it. If the game isn't fun, explain why. All of this can be combined into one post as you go. It's easier to transition your thoughts into a larger design as well, then into some details. What you can't do Write an essay here. It's too long, too broad, and not really what you are looking for. "Too long" means you really need to trim it down to what you feel is a good amount for the first post. You need to detail things and make it clear what you want. Make it clear that you know your opinion is out of line but you need to help others see it. Try keeping it

---

brief and direct when posting. You can expand on anything in more detail later, once you have made the post. How many posts should you write? As the game is so early in development, the scope is rather small. You can probably expect no more than 2 or 3 posts, if even that. Keep your posts brief and direct. I recommend making one post for each thing you're looking

The game world, known as Dokuro, was altered by some unknown force, causing

---

events to happen in a different timeline than our own. The chaos this caused led to creation of the Diamond Eyes, a group of psychics who control the Dokuro. As a teenager, our hero wants nothing more than to rid the world of these psychics, and so he sets out on a quest to uncover the truth behind the world he has been sent to. The original version of the game was a visual novel: anime, with user-selectable dialogue and a few story arcs to follow. It features lots of unique art, with no pre-drawn backgrounds and unique illustrations everywhere. There are many choices to make that change the story. Key Features - Control over dialogue with a choice tree; go for one-liners or keep your thoughts to yourself - Canons-based story where arcs follow a certain character's development - Visual Novel style with full fledged game mechanics, multiple endings, and several unlockable bonus scenes and illustrations - Dialogue controls - Ability to unlock bonus scenes and illustrations if you play through

---

the game multiple times (if you play the game for 50+ hours of enjoyment you get to see all the extra content!) - Game will not be released digitally until the visual novel is finished, which is currently scheduled to be finished in December 2013 (April 2015 in Japan). Play as the people we use to be, but are no longer. When our hero wakes up in a strange underground world, he'll need to work through events that appear to be unfolding differently from our own. At the same time, his fellow travelers of an ancient order will try to stop him from his quest. This is a horror game where your choices matter. Features Different story paths, complete with different endings Permadeath, in a horror game - no save progress Control of player character and objects in the world 200+ different creatures and enemies 9+ hours of gameplay About This Game: We are obsessed with a different kind of horror. The game that has been a favorite of horror fans since it first released five years ago. The horror game with no save progress and no

For the first time in the series, we get to see a more real-time combat system. There's no more option menu battles where you throw away your characters from previous games. You can battle and build your characters at any time. This combat system was "Phantom Breaker: Battle Grounds" is different from the previous games. As the combat is real-time, you have to think in the next few seconds The the turnaround speed is super fast, and you have to understand the situation on the battle field So the other players can't move so much. The battle system is very simple. It's so simple that you can do this in Even 2 minutes. Anyway, let's

---

go into the battle first. This map is clearly a arena, and there are a lot of vendors. There's plenty of room for extra attack. However, you can't run anywhere without getting hit. So you can't escape unless you take a surprise. In this map, there's a lot of places you can hide. So you can hide and be prepared for an ambush. However, it takes more time to get there, so you have to think twice whether to go there or not. "Where can I hide? There's not enough time." You have to focus on your next battle and not on others. You have to think about when you can get rid of them next. You can't go into a battle on your own power. You have to be together and then attack your target together. You have to be careful in this map. Especially on this map because there's a lot of vendors in the middle. Everyone else might be scared But you have to stay alive to win the game You can move, but you can't hide. The enemy are always watching you so be careful. It's almost like a stealth attack. You have to be quiet. There's a lot of

---

venders on the edges, so you have to move carefully. Not too slow but not too fast. There're some venders that will approach you, so you have to worry about them. You can't just stand there. You have to move out of the way. When they hit you, you lose your turn. So you have to defend yourself. It's a fine balance of moving and defending yourself. You need to take the right timing or you'll get mad

#### What's new:

**People in the mid to late 1990's released a lot of good soundtracks, but Zero Wing and Wing Diver II by Digital Dreams stood above the rest in quality. I wonder if they do any remakes of them these days? infernuband 08-16-2002, 05:32 PM Haha, ah, the Wingdiver II soundtrack is something i love. On Limewire, there is some songs you can buy, it's in MP3 format. Ebay.com, there is more, but it really shouldn't be too expensive. Dkyls 08-16-2002, 05:45 PM About a year ago I bought a single CD compilation called Wingsuit from the Sega Dreamcast series. The guy who compiled it, billed it as being 'The only CD release of 5 Wing for the Sega Dreamcast.' I don't know if it would be worth all the fuss to buy because I really enjoy the Wingdiver II soundtrack. Sure its old and now there are tons of Wingdiver games out, but I figure if the Wingdiver 2 soundtrack is good then Wingdiver II must be decent, at the least. From all the Wing games I own, Wingdiver II is the only one that I can just sit back and relax and enjoy. I doubt they'll bother putting out a Wingdiver II CD anytime soon. sunwarrior 08-16-2002, 08:54 PM Originally posted by infernuband: Haha,**

I have that cd, before the pre-order for sigma. I think my hard-drive is going to revolt just to watch it. :eek: I remember those days... do we want exclusive music? If it's a classic thats another story, but if its Wing Divers II/Wing Divers FE. I don't wanna hear a remix. Haha, damn I sound like an old gamer already. avreamer 08-16-2002, 10:19 PM I remember those days... do we want exclusive music? If it's a classic thats another story, but if its Wing Divers II/
