A new dangerous threat to mankind, a lethal alien virus is well on its way to infect the Earth and humanity is in serious danger. During a routine search and destroy mission, you receive the order to find the source of the infection, seal off the doors and windows to the office of a prestigious company. But when you get inside, you find that no one is there. Bewildered, you try to investigate further. The building is rigged with traps and booby-trapped with bloodstained bullets. When you see a painting that's different from any of the others, you come to the conclusion that the place belongs to a broken world, a pathetic imitation of what life was once like. We've been infected. And now it's up to you to find a way to survive. About The Game Z-Blood - the original story was envisioned by young and ambitious game programmers. From the creators of the game: Zombie Assault 2: 2nd and improved version of Zombie Assault, the game was released in December 2011. Featuring 6 different types of zombies, a total of 49 locations, more than 15 hours of gameplay, lots of weapons, secret locations, player vs player mode (the first in the Slasher genre) and lots more. Zombie Assault 3: The only unique part of this game is the application that prevents zombies from entering the house. In order to manage this, you use melee weapons and grenades against them. The main difference is that this game lacks a main enemy and contains only three types of zombies. Zombies do not break when they take hits, but they explode after 1 minute if they do not find a way to move out. A few techniques you can use to increase your chances of survival: - Use fire. You can place it and extinguish it in a few seconds, making the zombies burn. This works only if the fire is kept alive, so you must be wary of gasoline and explosives. - Use bombs. With grenades, you can destroy the floor and walls and kill all the zombies that are on them. Make sure you do it before the debris breaks and you fall through the ceiling. - Use direct hits. When a zombie takes a direct hit, it will start running until it reaches the door and then it will explode. If you aim for the head, you can blow up zombies at a great distance with a 360 degree hit.

. Being the first to write the words "My Way," Leonard Molinari fought all his life for all the freedoms of the man. The praiseworthy Italian journalist and author has striven to defend man against violence, violation of rights and hate. His works and books have contributed towards the important right to freedom and the placing of the writer at the heart of humanity's search for meaning. 28 October 2013 - Independent bookstores are now no more (at least in the big cities): following years of erosion of their business, they have given way to chain stores or e-books. Most of the boxes in bookstores sell more books today than they did a few years ago. What has happened to the small independent bookshop? The trend towards the big grocery chain started, according to 'Independent Bookstore News', in 2012, first in Italy and then in Europe. People moved to the big bookstores and to the newsagents or direct e-commerce. In Italy, for example, in 2012 there were 11,300 independent bookstores vs. 10,500 last year. In the first quarter of 2013 the number dropped again to 8,000-8,500. The Managing Director of L'Arc, an Italian bookstore chain, for example, admits that the chain stores are "a necessary evil", because of the rise in e-books, and will certainly be around in the long term, because they offer what people are looking for. But they are not in the right place, he says, because the events and meetings in bookshops are the highlight of a person's life. Independent bookstores - the independent and majority of the independent book stores have been closed or are being phased out. The reasons for the decline in the number of bookstores are many, but there are several. According to Azzi, an Italian bookshop chain, people are either buying books online or going to the shop to order a new copy; the shelves of big book stores are in competition with other means of buying books that are becoming increasingly easy to order, such as e-books, people are buying fewer books and bookshops are under pressure to change, and to do more with less. As said by Francesca Russo, Director of Research and Marketing for the Independent Bookstore Association of Italy ('The Independent Bookstore News'): "Independent bookshops are not having the high amount of traffic they
