

“How many games have you played that were based on biology, chemistry or other scientific specialties? There are surprisingly few. CREATURA is one such game, offering us a taste of life as both a ghost and a scientist.” Ortralis “A quite clever, very original and quite generous puzzle game that leaves you feeling satisfied as you eventually figure out and understand how things work.” Bangzilla In the land of the dead, where even light is part of the ever evolving natural world, the restless and troubled souls pass judgment on one another, mostly, but not always, targeting the living. They twist the law to suit their whim, and when the living affect their judgement, they’ll even change the course of history. All of which is in quite good contrast with the shiny and perfectly behaved world of Ghost Light. The story of Ghost Light is simple and straightforward: It’s the story of an ageing scientist and a younger artist (who does all the rendering of the game), and their interactions with each other and with the plants, animals and other people which they encounter in their pursuit of a grand prize in the form of immortality. The science in the game is the setting, and even though it is definitely the more grounded side of the two protagonists, it feels right, because the world of the dead doesn’t exist in a vacuum. The interactions with the animals, the plants and the people that inhabit the land of the dead are all quite strongly grounded in the real world, which makes the game a truly satisfying set of choices. It is not, however, the plot, although the two protagonists are very well-developed characters and they serve as the central figures of the game, so if you want, you can read a story while playing Ghost Light. Ghost Light is in no way about solving puzzles, it’s about exploring a natural world and telling a story about the way life works and what it means to be alive. It has a full cast of characters, each with their own ‘feelings’ and ‘behavior’, and each with their own quirks and beliefs that make them easy to distinguish. Even though the cast of characters from the plant world to the ghost world are given a unique feel, the characters and their interactions with each other are very well-developed, making a good introduction to the whole world of the dead. The best way to play Ghost Light is to

A young, newborn baby sleeps in a milk box in the middle of the desert in Arizona this week.‘The baby is well and nursing as she should,’ said toddler’s mother Caitlin McCain, adding that her thoughts and prayers were with the the family of Keegan Humphries, who gave birth to the baby, via c-section, in a hoarding that had become uninhabitable and took place in a box-lined garage in Ford, Arizona, last week.’

Around 10 million California households with infants, children or other dependents have a shortage of medicine, and tens of thousands have no drinking water. Because of the state’s extreme drought conditions, so far this year, as many as 1.5 million people may be enduring significant food shortages, the charity said.

Keegan Humphries, 24, said he was desperate to provide better for his son, a six-week-old boy. As well as bottled water and milk for his newborn son, he said he was just three months into adopting his child and not working to provide any of the above.

He said the family had been struggling for days with a lack of food.‘I’ve been in a trailer with

This work reports a new mobile element from Trypanosoma cruzi named SviaPlug. This element lacks a terminal inverted repeat and is intermediately related to the previously described mariner retrotransposons Tc12, Tc9 and Tc-mariner and mobilizes with transposition potential in Trypanosoma spp. SviaPlug was detected in the sequences of six putative retrotransposon pseudogenes, Tc-tryp, Tc-retro-I, Tc-retro-III, Tc-retro-II, Tc-retro-IV and Tc-retro-V, which also harbor in their 3’ flanks the above-mentioned three Tc-mariner-like elements described here as Tc-mariner, Tc9 and Tc12. All the T. cruzi pseudogenes and other trypanosomatid sequences share a conserved structure of polyproline sequences, a putative 3’ polyproline tract and c9d1549cdd

The Shadows of the Deep is a Pathfinder Roleplaying Game compatible adventure for four to six characters of 5th to 7th level. The sun rises on a beautiful morning to find the farming families of Pindleton already out in the fields, tending their crops and collecting their harvests. Their fields cover many acres, and have always yielded a great enough bounty to not only feed the village, but provide enough for sale at the market in a nearby city... yet the people are in danger of starvation. A danger from the depths of the world has come to the surface, their intentions as dark as their scales, and their plans well calculated and insidious. Shadows of the Deep introduces a new sub-race of kobold to your campaign, one that has not only survived free in the dark and dangerous world beneath the surface, but thrived. It will challenge the investigative skills of your PCs, as well as set them on edge as they wonder what surprise these cunning foes have waiting for them around the next bend. As the adventure begins the party is asked discover who and what is stealing the harvest from the farming village of Pindleton, and bring them to justice. The cunning and creativity of the kobolds makes this challenging to be sure, but the true test begins when the adventurers track them to their Warren, which they will defend with every trap, trick and tactic in their arsenal... Includes: Adventure through a living dungeon, that changes and responds to the presence of your PCs! Face cunning foes who are more than a pile of hit points waiting to fight adventurers! Set the stage for future adventures in the depths of the world! Kobolds: Not just laughable lizards anymore! Requires: A Fantasy Grounds full or ultimate license or an active subscription and
