An online sandbox game creation system developed by Roblox Corporation, the platform allows players to create games by authoring user-created games known as scripts. Users of the platform are called "builders," those who create games are "developers," and those who play games are "players." It was created by David Baszucki and Erik Cassel in December 2004. The platform became publicly available in November 2006, and Roblox began to rapidly grow in the second half of the 2010s. Gameplay Roblox is an online sandbox game that allows users to create games using its user-created scripting language, Lua. Although many builders use the Roblox editor to create games, certain games may require the use of a game engine, such as Unreal Engine. Games built with game engines can be played on Roblox's dedicated gaming servers, while the other games are played on other networked computers. System and moderation Roblox is owned by the game developer Roblox Corporation, founded by Roblox co-creators David Baszucki and Erik Cassel on December 13, 2004. Players can "rent" a video game license from Roblox for \$1 a month or \$100 a year, which gives the player access to all the games they have created. As of May 2015, the platform had 164 million monthly active users, of whom 53 million were children younger than 16. Roblox users can create games with their account, which is protected by a user ID. Players can then send Robux to other players, which are used to buy items in the Robux Shop, which includes third-party user-created games and pay for advertising on Roblox. Items can be purchased in the Robux Shop with real money, or earned using the free Robux users are given at certain times. Some users have used mods or alternative game engines to make Roblox games; between 2006 and 2012, there were millions of these "base" games, games which the user can play using only the standard Roblox editor. Platform Roblox is a multi-platform application. It is created using Lua, and consists of the "Builder", "Server", and "Client" components. Builder The Roblox Builder is the program used to create content for the Roblox platform. It is available as a free open-source software tool for Windows, Mac OS X, Linux, and the Xbox One. The
